Question 1

to find the points of intersection of the two curves

$$-x^2 + 2 = x^2 - x^2 - bx + 2$$

MI

$$x^2 - bx = x(x^2 - b) = 0$$

$$\Rightarrow x = 0 ; x = \pm\sqrt{b}$$

AI/AI

$$A_1 = \int_{-\sqrt{b}}^{\sqrt{b}} [(x^2 - x^2 - bx + 2) - (-x^2 + 2)] dx \left(= \int_{-\sqrt{b}}^{\sqrt{b}} (x^2 - bx) dx \right)$$

MI

$$= \left[\frac{x^3}{3} - \frac{bx^2}{2} \right]_{-\sqrt{b}}^{\sqrt{b}}$$

$$= - \left[\frac{(-\sqrt{b})^3}{3} - \frac{b(-\sqrt{b})^2}{2} \right] = - \left[-\frac{b^{\frac{3}{2}}}{3} + \frac{b^{\frac{3}{2}}}{2} \right] = \frac{b^{\frac{3}{2}}}{6}$$

AI

$$A_2 = \int_0^{\sqrt{b}} [(-x^2 + 2) - (x^2 - x^2 - bx + 2)] dx$$

MI

$$= \int_0^{\sqrt{b}} (-x^2 + bx) dx$$

$$= \left[-\frac{x^3}{3} + \frac{bx^2}{2} \right]_0^{\sqrt{b}} = \frac{b^{\frac{3}{2}}}{6}$$

AI

therefore $A_1 = A_2 = \frac{b^{\frac{3}{2}}}{6}$

Parliament. House of Commons. Scottish Affairs Committee, 2016 The Scottish Affairs Committee has published a report calling for reform to visa rules for non EU students studying in Scotland who wish to remain in the UK to work after their studies In their report the Committee have found that current rules for students studying here to remain in Scotland are too restrictive and are preventing businesses from finding skilled workers Scotland faces different demographic challenges to the rest of the UK with a much lower birth rate and significant skills gaps in the workforce Sectors such as health energy and finance face particular problems in recruiting skilled graduate workers The Committee found that the closure of the Tier 1 Post Study Work visa in 2012 has harmed Scotland by making Scotland less competitive in the global education market with other nations able to offer prospective students greater employment opportunities after graduation Closing this visa has also prevented Scotland from making use of a pool of skilled workers educated in Scotland who could help mitigate Scotland's demographic challenges Since the Post Study Work visa was closed in 2012 the number of non EU students remaining in the UK after graduating has fallen by 80% *Digital Games and Mathematics Learning* Tom Lowrie, Robyn Jorgensen

(Zevenbergen), 2015-10-05 Digital games offer enormous potential for learning and engagement in mathematics ideas and processes This volume offers multidisciplinary perspectives of educators cognitive scientists psychologists and sociologists on how digital games influence the social activities and mathematical ideas of learners gamers Contributing authors identify opportunities for broadening current understandings of how mathematical ideas are fostered and embedded within digital game environments In particular the volume advocates for new and different ways of thinking about mathematics in our digital age proposing that these mathematical ideas and numeracy practices are distinct from new literacies or multiliteracies The authors acknowledge that the promise of digital games has not always been realised fulfilled There is

emerging and considerable evidence to suggest that traditional discipline boundaries restrict opportunities for mathematical learning Throughout the book what constitutes mathematics learnings and pedagogy is contested Multidisciplinary viewpoints are used to describe and understand the potential of digital games for learning mathematics and identify current tensions within the field Mathematics learning is defined as being about problem solving engagement in mathematical ideas and processes and social engagement The artefact which is the game shapes the ways in which the gamers engage with the social activity of gaming In parallel the book as a textual artefact will be supported by Springer's online platform allowing for video and digital communication including links to relevant websites to be used as supplementary material and establish a dynamic communication space

Math Education for America? Mark Wolfmeyer, 2013-12-04 Math Education for America analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States The effort to standardize a national mathematics curriculum for public schools in the U S culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics Rather than looking at the text of specific policy documents this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis Breaking new ground in detailing and theorizing the politics of math education Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated developments human capital education policy debates over traditional and reform pedagogy the assumed content knowledge deficit of math teachers and the proliferation of profit driven educational businesses By establishing the interconnectedness of these interests with the national math education curriculum he shows how the purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest

How Chinese Acquire and Improve Mathematics Knowledge for Teaching Yeping Li, Rongjin Huang, 2018-05-16 While the importance of knowledge for effective instruction has long been acknowledged and the concept and structure of mathematics knowledge for teaching are far from being new the process of such knowledge acquisition and improvement remains underexplored empirically and theoretically The difficulty can well associate with the fact that different education systems embody different values for what mathematics teachers need to learn and how they can be assisted to develop their knowledge To improve this situation with needed consideration about a system context and policies How Chinese Acquire and Improve Mathematics Knowledge for Teaching takes a unique approach to present new research that views knowledge acquisition and improvement as part of teachers life long professional learning process in China The book includes such chapters that can help readers to make possible connections of teachers mathematical knowledge for teaching in China with educational policies and program structures for mathematics teacher education in that system context How Chinese Acquire and Improve Mathematics Knowledge for Teaching brings invaluable inspirations and insights to mathematics educators and teacher educators who wish to help teachers improve their knowledge and to researchers who study this important topic beyond a
