Mathematical Studies Standard Level for the IB Diploma Coursebook Caroline Meyrick, Kwame Dwamena, 2013-05-30 This completely new title is written to specifically cover the new IB Diploma Mathematical Studies syllabus. The significance of mathematics for practical applications is a prominent theme throughout this coursebook, supported with Theory of Knowledge internationalism and application links to encourage an appreciation of the broader contexts of mathematics. Mathematical modelling is also a key feature. GDC tips are integrated throughout, with a dedicated GDC chapter for those needing more support. Exam hints and IB exam style questions are provided within each chapter. Sample exam papers online can be tackled in exam style conditions for further exam preparation. Guidance and support for the internal assessment is also available, providing advice on good practice when writing the project.

Best-Practice EVA Bennett Stewart, 2013-02-19 Best Practice EVA tells the new EVA story from the ground up. Stewart covers EVA essentials: the classic economic profit version of EVA in the first three chapters of the book. He shows readers how simple and intuitive EVA really is, how it is defined, and why it is better than all other measures of corporate profit. You discover how it naturally guides managers into making all the right decisions, the ones that will truly maximize value. You see how to use it in profit sharing, bonus plans that create the powerful incentives of an owner. Later, Stewart introduces new ratios that make EVA much more powerful and much easier to use than ever before. The pinnacle of the new ratio framework is EVA Momentum, calculated by taking the change in EVA versus the prior period and dividing by the revenues in the prior period. It measures the growth rate in EVA scaled to the sales size of the business. It is the only corporate performance ratio where bigger is always better because it gets bigger when EVA does, which means it should be every company's most important financial goal, the one ratio metric that everyone aims to maximize as the key measure of corporate success. Stewart then walks through the nuts and bolts of Best Practice EVA, kicking off with an in depth look at EVA Margin or EVA as a percent of sales. It's a key productivity metric and Stewart's candidate to replace ROI. The last link in

the Best Practice program is PRV it the EVA market score report Stewart shows how to read and interpret the report how the score is determined and why investors are turning to it to screen and rate stocks He also shows why it is finding a home with CFOs and IR directors who want insights into how the market is pricing their stock The book concludes with battle tested tips from the firing line practical suggestions for how you can test drive and adopt Best Practice EVA at your company
