**VFL:** Mandatory tool for any technician dealing with fiber patchcords and launch cables, the built-in visible light source allows for quick fiber continuity checks and visual break location, without the need of additional tools.

**Optical Power Meter:** Essential tool for quick power level measurement on live fiber, the built-in power meter keeps the instrument on line, without the use of additional test equipment.

**Loss Test Set/Talk Set:** The built-in talk set option allows communication between both ends of the fiber while the test is running. The user can also send commands or transfer results to the product at the other end for immediate comparison or remote control. A data transfer function allows immediate far end results and performs bi-directional OTDR analysis.

A power meter and a light source are necessary for attenuation (insertion loss) measurement on fiber links. The built-in loss test set option allows for the measurement of end to end loss without the need of other instruments.
