set against the backdrop of the spread of neoliberal ideas and reforms since the 1980s. While accepting that these ideas are rooted in a longer history, the authors reveal how neoliberalism has transformed the university sector and the academic profession. In particular, they focus on how understandings of what knowledge is relevant and how this is decided have changed. Taken as a whole, reforms have sought to reorient universities and academics towards economic development in various ways. Shifts in how institutions and academics achieve recognition and status combined with the flow of public funds away from the universities and the increasing privatisation of educational services are steadily downgrading the value of public higher education. As research universities adopt user and market oriented operating models and prioritise the demands of the corporate sector in their research agendas, the sale of intellectual property is increasingly becoming a primary criterion for determining the relevance of academic knowledge. All these changes have largely succeeded in transforming the discourse around the role of the academic profession in society. In this context, Makerere University in Uganda has been lauded as having successfully achieved transformation. However, far from highlighting the allegedly positive outcomes of this reform, this book provides worrying insights into the dissolution of Uganda's academic culture. Drawing on interviews with over ninety academics at Makerere University, from deans to doctoral students, the authors provide first hand accounts of the pressures and problems the reforms have created. Disempowered, overworked and under resourced, many academics are forced to take on consultancy work to make ends meet. The evidence presented here stands in stark contrast to the successes claimed by the university. However, as the authors also show, local resistance to the neoliberal model is rising as academics begin to collaborate to regain control over what knowledge is considered relevant and wrestle with deepening democracy. The authors' careful exposé of how neoliberalism devalues academic knowledge and the urgency of countering this trend makes *Democracy and the Discourse on Relevance Within the Academic Profession at Makerere University* highly relevant for anyone working in higher education or involved in shaping policy for this sector.

India-Africa Economic Relations in the New Global Economy Rick Rowden, 2025-03-18. While there have been many books about China's growing economic role in Africa, this book explores the much less well known story of India's growing economic role in Africa. And like the big debates about China's role in Africa, this book similarly asks if India is acting as a helpful development partner in Africa, an exploitative new colonizer, or if the answer ultimately has to do with the degree of agency exercised by African governments. While the book documents the significant increase in Indian aid, trade and FDI in Africa in the new millennium, it also offers much more. It comprehensively looks at theories of economic development, the debates about the role of trade and industrial policies in economic development strategies, colonial and post colonial literature, and controversial features of today's global political economy as the background to study Africa and frames Africa-India economic relations in these broad contexts. The book reviews the history of India's diplomacy, trade and investment in African countries since decolonization, with a focus on the increased economic ties of the past two decades. The main question examined is about the longterm

impact that India's economic relations are having in African economies and if India is helping Africa to successfully develop over time or not. The author examines India's economic and strategic interests in the African region and offers a comparative analysis of Africa's trade with India, China, the European Union, and other African nations. The book also explores a number of outstanding issues in India-Africa relations today such as Africa's role as a source of oil, gas, and critical minerals needed by India; the lifesaving role of Indian generic medicines across the continent; the nature of the agricultural development model that India is introducing in Africa; and key areas where Indian and African governments are cooperating in the international arena. The book offers a critical and in-depth look into the partnerships India has developed with African countries and contributes to the debate on economic relations between a more developed emerging market like India and less developed countries. A major contribution to the emerging area of South-South economics, this book, part of the Critical Political Economy of South Asia series, will be useful for scholars and researchers of economics, development economics, development studies, public policy, diplomacy, African studies, political economy, South Asian economics, and international politics and trade.
