The purpose of this document is to guide the reader regarding the current state of the FZ1200R17KF4 + FZ1200R16KF4 IGBT which are found on F35w and some shops selling this product in EUFEC is a German bought manufacturer started in the 1990's a subsidiary of Infineon Technologies. It is very popular and has been used on frequency inverters. In 2005, Infineon is integrated to ON Semiconductor. It is very hard to find this product nowadays as it is old now and there are many light of this type so it is not listed. After few years working on this product I think is what I said just.

The picture of the module is a good example of a new IGBT module. The module is a black, rectangular component with a white label in the center. The label contains the text 'Infineon FZ1200R16KF4', a barcode, the date '45/21-1131', and the number '90'. The module is mounted on a metal base with two large, dark, rectangular heat sinks on either side. A red wire is visible on the left side of the module.
