Think Like a Freak Steven D. Levitt, Stephen J. Dubner, 2014-05-13 From the rule-breaking authors of international bestsellers Freakonomics and Superfreakonomics this is the ultimate guide to how to Think Like a Freak The Freakonomics books have come to stand for something challenging conventional wisdom using data rather than emotion to answer questions and learning to unravel the

world's secret codes Now Levitt and Dubner have gathered up what they have learned and turned it into a readable and practical toolkit for thinking differently thinking that is like a Freak Whether you are interested in the best way to improve your odds in penalty kicks or in major global reforms here is a blueprint for an entirely new way to solve problems Along the way you'll learn how the techniques of a Japanese hot dog eating champion can help you the reason an Australian doctor swallowed a batch of dangerous bacteria why Nigerian e-mail scammers make a point of saying they're from Nigeria and why Van Halen's demanding tour contract banning brown M&Ms was really a safety measure You'll learn why sometimes it's best to put away your moral compass and smarter to think like a child You will be given a master class in incentives because for better or worse incentives rule our world And you will learn to quit before you fail because you can't solve tomorrow's problem if you aren't willing to abandon today's dud Levitt and Dubner see the world like no one else Now you can too Never before have such iconoclastic thinkers been so revealing and so much fun to read How We Think, but not in School

Patrick J. Lewis, 2007-01-01 If story is the basic principle of mind then what are we doing in elementary schools In this provocative exploration of narrative the author writes from the idea that story is integral to the generation of meaning in human experience Indeed story plays a significant role in the formation of identity and the development of greater empathic understanding The text begins with a discussion of the epistemological and ontological nature of narrative in human understanding and then travels across the narrative landscape of the school setting Through an examination of the impact of standards and accountability emphasis on curriculum the author suggests current practice may be undermining student learning and engagement Further the author places oracy in temporary opposition to literacy challenging us to rethink our assumptions about the role of literacy in learning Without negating the importance of literacy attention is drawn to what is lost in chasing the assumed inherent goodness of a text-based literacy and how this might hinder the growth of our children The value of narrative in developing teaching practice and promoting significant learning is brought to the foreground of the discussion which naturally journeys into an exploration of curriculum raising serious questions about developmental approaches to curriculum construction How we think but not in school will appeal to elementary teachers early literacy teachers teacher educators and those interested in narrative The Book Review Digest, 2005 **Journal of Economic Literature**, 2007
