Spanning Silos the unfettered decentralization that produces silos is no longer feasible in today's marketplace. It's up to chief marketing officers to break down silo walls to foster cooperation and synergy. This isn't easy; silo teams guard their autonomy vigorously. As proof of their power, consider the fact that the average CMO tenure is just twenty-three months. How to proceed? Drawing on interviews with CMOs, Aaker explains how to: Strength your credibility with silo teams and your CEO. Use cross-functional teams and other strategic linking devices. Foster communication across silos. Select the right CMO role from facilitator to strategic captain. Develop common planning processes. Adapt your brand strategy to silo units. Allocate marketing dollars strategically across silos. Develop silo-spanning marketing programs. In this age of dynamic markets, new media and globalization, getting the different parts of your organization to collaborate is more critical and more difficult than ever. This book gives you the road map you need to accomplish that feat.

Design Thinking at Work

David Dunne, 2018-01-01. The result of extensive international research with multinationals, governments, and non-profits, *Design Thinking at Work* explores the challenges organizations face when developing creative strategies to innovate and solve problems. Noting how many organizations have embraced design thinking as a fresh approach to a fundamental problem, author David Dunne explores in this book how this approach can be applied in practice. Design thinkers constantly run headlong into challenges in bureaucratic and hostile cultures. Through compelling examples and stories from the field, Dunne explains the challenges they face, how the best organizations, including Procter & Gamble and the Australian Tax Office, are dealing with these challenges, and what lessons can be distilled from their experiences. Essential reading for anyone interested in how design works in the real world. *Design Thinking at Work* challenges many of the wild claims that have been made for design thinking while offering a way forward.

Resisting Educational Inequality

Susanne Gannon, Robert Hattam, Wayne Sawyer, 2018-06-12. *Resisting Educational Inequality* examines poverty, social exclusion, and vulnerability in educational contexts at a time of rising inequality, and when policy research suggests that such issues are being ignored or distorted within neoliberal logics. In this volume, leading scholars from Australia and across the UK examine these issues through three main focus areas: Mapping the damage: what are our explanations for the persistent nature of educational inequality? Resources for hope: what do we know about how educational engagement and success can be improved in schools serving vulnerable communities? Sustaining hope: how might we reframe research policy and practice in the future? Using a range of theories and methodologies, including empirical and theory-building work as well as policy critique, this book opens innovative areas of thinking about the social issues surrounding educational practice and policy. By exploring different explanations and approaches to school change and considering how research policy and practice might be reframed, this book moves systematically and insightfully through damage towards hope. In combining pedagogy, policy, and experience, *Resisting Educational Inequality* will be a valuable resource for all researchers and students, policymakers, and education practitioners.
