Nutrition-related Oversight Review United States. Congress. House. Committee on Science and Technology.

Subcommittee on Domestic and International Scientific Planning, Analysis, and Cooperation, 1977 *Planet Health* Jill Carter, 2007 The second edition of *Planet Health: An Interdisciplinary Curriculum for Teaching Middle School Nutrition and Physical Activity* offers an innovative approach to teaching health education. You can use this proven evidence-based curriculum to teach students about nutrition and physical activity while helping them build skills and competencies in language arts, math, science, social studies, and physical education. The curriculum is designed for use by teachers in core academic areas as well as in physical education and health. This new edition includes revised nutrition and physical activity information ensuring that you're equipped with the most up-to-date science. The book also includes an all-new CD-ROM with plenty of reproducible worksheets, parent information, and newsletters, school health resources, and other teacher resource materials. Like the popular first edition, *Planet Health* provides 35 complete, ready-to-use lesson plans and 31 microunits that promote healthy nutrition and activity materials and instructions to implement *Power Down*, a two-week campaign to reduce television and other media viewing time which you can launch in the classroom or school-wide, and *FitCheck*, a self-assessment tool to help students track and improve their activity levels. In addition, the book includes access to a Web site which features a teacher training PowerPoint presentation, a *Planet Health* FAQ, and more. *Planet Health: Second Edition* encourages students to think holistically about how health behaviors are interrelated and it offers a constructivist approach to teaching and learning. With this approach, you can build on your students' knowledge and experiences to create an active inquiry-based, student-centered learning environment, one in which students learn best as they construct meaning for themselves. Developed by educators and scientists at the Harvard School of Public Health, *Planet Health: Second Edition* is aligned with the Massachusetts Department of Education Curriculum Frameworks, learning standards for health, language arts, math, science, and technology, and history and social science, and it meets the standards in many other states. Every *Planet Health* lesson incorporates a range of language arts learning standards and engages students through discussion ideas for small or large groups in which they cooperatively learn and solve health-related issues. Active discussions are used to encourage higher-level thinking and cognition, and peer group work fosters social development. This new edition of *Planet Health* is the perfect antidote to kids' inactivity, poor food choices, and high levels of screen viewing time. Acquiring good habits regarding nutrition and physical activity in adolescence often carries over into adulthood. Help your students develop good habits now with *Planet Health: Second Edition*, and they'll have a better chance of growing into healthy adults.
