Building Your Next Big Thing with Google Cloud Platform Jose Ugia Gonzalez, S. P. T. Krishnan, 2015-06-15. *Building Your Next Big Thing with Google Cloud Platform* shows you how to take advantage of the Google Cloud Platform technologies to build all kinds of cloud hosted software and services for both public and private consumption. Whether you need a simple virtual server to run your legacy application or you need to architect a sophisticated high traffic web application, Cloud Platform provides all the tools and products required to create innovative applications and a robust infrastructure to manage them. Google is known for the scalability, reliability, and efficiency of its various online products from Google Search to Gmail. And the results are impressive. Google Search for example returns results literally within fractions of a second. How is this possible? Google custom builds both hardware and software including servers, switches, networks, data centers, the operating system's stack, application frameworks, applications, and APIs. Have you ever imagined what you could build if you were able to tap the same infrastructure that Google uses to create and manage its products? Now you can. *Building Your Next Big Thing with Google Cloud Platform* shows you how to take advantage of the Google Cloud Platform technologies to build all kinds of cloud hosted software and services for both public and private consumption. Whether you need a simple virtual server to run your legacy application or you need to architect a sophisticated high traffic web application, Cloud Platform provides all the tools and products required to create innovative applications and a robust infrastructure to manage them. Using this book as your compass, you can navigate your way through the Google Cloud Platform and turn your ideas into reality. The authors, both Google Developer Experts in Google Cloud Platform, systematically introduce various Cloud Platform products one at a time and discuss their strengths and scenarios where they are a suitable fit. But rather than a manual-like "tell all" approach, the emphasis is on how to "Get Things Done" so that you get up to speed with Google Cloud Platform as quickly as possible. You will learn how to use the following technologies among others: Google Compute Engine, Google App Engine, Google Container Engine, Google App Engine Managed VMs, Google Cloud SQL, Google Cloud Storage, Google Cloud Datastore, Google BigQuery, Google Cloud Dataflow, Google Cloud DNS, Google Cloud Pub/Sub, Google Cloud Endpoints, Google Cloud Deployment Manager.
