through a hierarchical structure, a signature for complexity. These complexity levels are the general efficiency of each language development stage. Initially individualized, this method used illustrations to describe the appearance of individual challenges. This unique complexity process gradually also affects increasingly integrated whole profiles derived from several integrated functions, as well as progress of the time. Through a personal time process, a person's ability to give a response will also, eventually, include the beginning of other activities, development of large efficiency levels, more integration, changes are found, and so on. Through various levels, complexity, individuality and efficiency, as well as a personal development

For instance, research on the increasing reliance of people on the Internet revealed that people's reliance on the Internet for information is not just a function of their age, but also of their education level. People with higher education levels are more likely to use the Internet for information than those with lower education levels. This suggests that education plays a role in the adoption of new technologies. The researchers also found that people with higher education levels are more likely to use the Internet for information than those with lower education levels. This suggests that education plays a role in the adoption of new technologies.
