AMC Javelin, AMX, and Muscle Car Restoration 1968-1974 Scott Campbell, 2015-06-15 There was a time when AMC performance was more of an afterthought to the muscle car era. Sure the Javelins and AMX cars were cool as were the really limited cars such as the Scrambler and the Rebel Machine, but with production numbers a distant fourth place in the American manufacturer muscle car scene, well you could be forgiven for not remembering much about them through the years. Fast forward to today and AMC muscle cars are among the fastest appreciating performance vehicles in the market. Low production numbers combined with capable performance and cool and unique styling have increased coverage in magazines and at auctions, making these cars more valuable than ever before. Concours restored AMC muscle cars routinely bring 30 000 to 65 000 in the collector car world, making a comprehensive restoration guide a must have for any American Motors enthusiast. *AMC Javelin AMX and Muscle Car Restoration 1968 1974* provides in depth coverage of the decoding and documentation process of an AMC muscle car, primarily the popular Javelin and AMX models. Author and expert AMC restorer Scott Campbell gives you a detailed account of important aspects of restoration including rust repair, panel and sheet metal replacement, interior and trim restoration, undercarriage, chassis, suspension and driveline rehabilitation, as well as every other major component group. Armed Non-State Actors in International Humanitarian and Human Rights Law Konstantinos Mastorodimos, 2017-05-15 The accountability of armed non state

actors is a neglected field of international law overtaken by the regimes of state responsibility and individual criminal accountability as well as fears of legitimacy Yet armed non state actors are important players in the international arena and their activities have significant repercussions This book focuses on their obligations and accountability when they do not function as state agents regardless of the existence or extent of accountability of their individual members The author claims that their distinct features lead to their classification into three different types de facto entities armed non state actors in control of territory and common article 3 armed non state actors The mechanisms that trigger the applicability of humanitarian and human rights law regimes are examined in detail as well as the framework of obligations In both cases the author argues that armed non state actors should not be treated as entering international law and process exclusively through the state The study concludes by focussing on their accountability in international humanitarian and human rights law and more specifically to the rules of attribution remedies and reparations for violations of their primary obligations
