Health planning reports subject index United States. Health Resources Administration, 1979      **No More Gaps** Laurie Rivers, 2010-08-27 In the remote regions of Australia's Northern Territory Indigenous Australians experience extreme disadvantage in health income employment education and access to the conditions for a good life This book is about their plight and how governments can deliver strategies to prevent the continuation of their disadvantage Governments and institutions like the World Health Organisation have expressed intentions to close the gaps that are represented by statistics on social disadvantage poverty and poor health Policies with titles such as closing the gap are much talked about in meetings and conferences But there is little understanding of the causes of disadvantage This book fills a gap in understanding of what creates disadvantage and of how to achieve development It revives the idea of the state as an active leader in creating developmental role incompatible with still dominant neo liberal policies It shows that with the right state strategies the aim of no more gaps can become reality No More Gaps analyses the regional impacts of free market ideology that has dominated Australian government policy during the past thirty years It argues that neo liberal economic theories have produced rapid growth of obscene wealth and increased inequality Growing gaps between rich and poor between the well served and the under served are prominent features of economic change in America Australia Britain and a number of poor countries No More Gaps advocates a return to economic development strategies that worked well in past particularly in the thirty years from 1945 to 1975 But it does not simply look back to that time of stronger economic growth It supports new economic approaches such as local food processing for food security It promotes accounting for environmental impacts of business It supports policies for reduced fossil fuel consumption It advocates new industries that use sustainable energy sources This book's extensive cross disciplinary critique of policies is unusual in an era of narrow knowledge specialisation Its analysis ranges between local regional national and global levels Few recent books attempt to integrate knowledge disciplines and strategic responses as ambitiously The author presents a holistic focus on what's required to overcome location based disadvantage in Australia Strategies to overcome extreme disadvantage in Australia provide a link between regional under development and national macro economic policy This is shown in book's analysis of Australian economic history      *Primary health care and continuous quality improvement* Alison Laycock, Ross Bailie, Lynette O'Donoghue, 2025-06-01 For most people the main point of access to the health system is through primary health care PHC The fundamental premise of primary health care is that all people everywhere have the right to receive the appropriate care in their community Primary health care attends to the majority of a person's health needs throughout their lifetime including physical mental and social wellbeing PHC is people centred rather than disease centred It is a whole of society approach that includes health promotion disease prevention treatment rehabilitation and palliative care Primary health care and continuous quality improvement An evidence based guide provides an accessible contemporary guide on implementing continuous quality improvement CQI in PHC
