Humanity Against Itself The Retreat From Reason:

Humanity Against Itself Benjamin Kovitz, M.D., 2012-04-30 In this broad overview of humanity's predicament psychiatrist Benjamin Kovitz illustrates the parallels between anxiety in the individual and discord in civilization as a whole Kovitz emphasizes that civilization rests upon the precarious foundation of human nature with its age old tendencies toward self deception violence and pursuit of power He argues that resistance to facing our hidden motives is what lies at the core of political and religious strife as well as individual anxiety At the heart of the book is an illuminating chapter on the meaning of anxiety explaining with clarity and detail how the pathology arises how it is expressed and how it can be relieved The complexities of the condition are portrayed in vivid clinical examples often using the patient's own words Kovitz takes issue with the current practice of relying solely on psychiatric medication without addressing the patient's understanding of what his or her symptoms mean On the societal level Kovitz shows how evasion of reality complicates our efforts at progress and peaceful coexistence despite the advances of science and democracy and how defensive behavior among nations can culminate in war Turning to religion Kovitz explores the psychological underpinnings of our need for religion and briefly summarizes the major world faiths with an eye to their underlying attitudes and assumptions While pointing out the contradictions inherent in a literal approach to religious dogma the author appreciates the need for faith that transcends logic In a psychiatric evaluation of the life of Saint Teresa of Avila Kovitz recognizes pathological anxiety yet respects the therapeutic value of her religious visions Writing with eloquence while avoiding psychological jargon Kovitz elucidates our human dilemmas with a clarity and depth that can help us move toward sanity in an unpredictable and troubled world

Philosophy, Literature and the Human Good Michael Weston, 2003-09-02 In this provocative new examination of the philosophical moral and religious significance of literature Michael Weston explores the role of literature in both analytic and continental traditions He initiates a dialogue between them and investigates the growing importance of these issues for major contemporary thinkers Each chapter explores a philosopher or literary figure who has written on the relation between literature and the good life such as Derrida Kierkegaard Murdoch and Blanchot Challenging and insightful *Philosophy Literature and the Human Good* is ideal for all students of philosophy and literature

Self-Construction and the Formation of Human Values Teodros Kiros, 2001-01-30 This volume presents a theoretical defense of the potential of ordinary individuals to construct values and through them to become self empowering responsible participants in a democratic community Rather than conceiving of power as domination the author identifies true power as self empowerment a notion based on self construction He proposes the vision of an authentically free self filled with a compassion that is a composite of reason and feeling Such a composite self does not consciously manipulate language truth and desire to dominate and subordinate other individuals but uses them to construct values and norms that can enrich others To support his argument the author draws on both classical and contemporary philosophers as well as on literary sources

Human Rights and

Personal Self-defense in International Law Jan Arno Hessbruegge, 2017 While an abundance of literature covers the right of states to defend themselves against external aggression this is the first book dedicated to the right to personal self defense in international law Dr Hessbruegge sets out in careful detail the strict requirements that human rights impose on defensive force by law enforcement authorities especially police killings in self defense The book also discusses the exceptional application of the right to personal self defense in military led operations notably to contain violent civilians who do not directly participate in hostilities The author establishes that international law gives individuals the right to forcibly resist human rights violations that pose a serious risk of significant and irreparable harm At the same time he calls into question prevailing state practice which fails to recognize any collective right to organized armed resistance even when it constitutes the last resort to defend against genocide or other mass atrocities

The War Against Marxism Tony McKenna, 2021-05-06 Marxism has provided the ideological impetus to liberation movements radical struggles and revolutions across the world But in the 20th century the emancipatory and democratic power of its thought has often been distorted and overridden by various Stalinist dictatorships which claimed to be acting in its name A similar undermining of freedom of thought has been accomplished at an intellectual level various schools have transformed Marxist thought in line with some of the most fashionable but gentrified forms of contemporary philosophy shifting the focus from the democratic power of the masses and their ability to challenge the capitalist order to concentrate on superstar thinkers and elite theories The War Against Marxism traces the war against Marxism which paradoxically has been conducted in the name of Marxism itself As such it provides a fiery philosophical and polemical indictment of so called Marxists such as Adorno Horkheimer Althusser Jameson Eagleton Mouffe Laclau and Zizek and asks what can be done to stem this counterrevolution

Against Life Alastair Hunt, Stephanie Youngblood, 2016-03-15 The contributors to Against Life think critically about the turn to life in recent theory and culture Editors Alastair Hunt and Stephanie Youngblood shape their collection to provocatively challenge the assumption rife throughout the humanities that life needs to be cultivated affirmed and redeemed The editors and their contributors explore how we might be better off daring to think ethics and politics as well as the project

of the humanities in more radical terms as a refusal to choose life What forms of equality and freedom might emerge if we did not organize being together under signs of life Taken together the essays in *Against Life* mark an important turn in the ethico political work of the humanities

Against Progress Slavoj Žižek, 2024-10-31 To define progress is to lay claim to the future Seminal thinker Slavoj i ek turns essayist to interrogate the competing visions which form the horizons of human possibility and ask Can things which have never seemed worse get better What would a better world be And how when we are constantly besieged by doomers degrowthers and disorienting relativisms can we make any headway at all in the face of unprecedented ecological social and political crises In thirteen iconoclastic essays Slavoj i ek disrupts the death grip that neoliberalists Trumpian populists toxic self improvement industries and accelerationists alike have established on the idea of progress Anatomizing what is lost when opponents of the future are allowed to define it i ek ruthlessly exposes what different visions of progress exclude or sacrifice and the dynamics of desire denial and disavowal at work in Hollywood blockbusters Buddhist economics decolonization movements and other engines of vision In a whirlwind tour that takes in everything from gentrification to the theory of relativity Lacan to Lenin Putin to Mary Poppins and Marine Le Pen to the end of the world these essays never stop asking hard questions of imagined futures Nor does i ek shrink from the hardest question of all How do we free ourselves from the hypocritical guilt ridden dreaming in which we re enmeshed and begin to build a better world
