**Exam Question:** Some people say education is the only critical factor to the development of a country. To what extent do you agree or disagree with this statement?

On the one hand good education is a highly recommended skill in the developed countries, on the other hand the highest wish of many people in regions of poverty. But what makes education to the key factor for the development of a country?

We must acknowledge that education is something that we all need. The differences are just what we learn. Mostly the limited educational horizons of poor and less educated people have more to deal with their personal situation than with problems of bigger effects on a country. Attending school is sometimes too expensive and it does not feed a family.

Nevertheless there must be a reason for education. For me it looks like some countries have realized that Education is the key for the globalization process. If we take India for example we can see that a change in the educational system had changed the economy of the country. The country has changed from a poor region to a high potential area for IT knowledge.

In regard to this fact it is a must that the Governments of less developed countries take the power of education seriously and offer it to a wide range of people. Spending money for education is the key tip to a new future effects on the economy and social life. All in all I agree with the importance of education for the development of a country. Less knowledge leads to poverty and not to knowledge that has wide effects. Learning and Knowledge is Power and an investment in the near future and therefore it has to be an official task.

you're tired of taking the IELTS several times and still not getting the score you want then you must download this book. It will save you time and you'll quickly understand the differences between low scoring answers and high scoring answers. This book has been put together to guide IELTS students on how to best answer the writing questions. Along with sample answers which the author has written herself, the book also shares important tips for helping you succeed. Writing Task 2 is designed to test your ability to write an academic style essay. You must present the information in your own words as complete sentences within paragraphs. You are required to write over 250 words and the task should be completed in about 40 minutes. Both part 1 and 2 must be finished in 1 hour.

**Types of Topics** There are many different topics for essays in the exam but typical topic areas include education, crime, media, technology, social issues, technology and the future, and the environment. In this case it makes sense to build up vocabulary in these key areas in order to have sufficient language to write an essay well.

**Types of Questions** There are three main types of essay questions that are included in the IELTS writing exam. It is important to learn how to structure each of these types. Each of these will be described more fully in the sections that follow. Briefly they are: an opinion essay where you are asked to give your own personal opinion on a topic, a both sides and opinion essay where you are required to discuss both sides of an argument and then give your own personal opinion on the topic, and a two question essay which involves responding to two different questions.

*Advances in Cognitive Translation Studies* Ricardo Muñoz Martín, Sanjun Sun, Defeng Li, 2021-11-18 This book presents the latest theoretical and empirical advances in cognitive translation studies. It involves the modes of written translation: interpreting, sight translation, and computer aided translation. In separate chapters, this book proposes a new analytical framework for studying keylogged translation processes, a framework that reconciles a sociological and a psychological approach for studying expertise in translation, and a pedagogical model of translation competence. It expands the investigation of cognitive processes by considering the role of emotional factors, reviews and develops the effort models of interpreting as a didactic construct. The empirical studies in this book revolve around cognitive load and effort; they explore the influences of text factors e.g. metaphors, complex lexical items, directionality while taking into account translator factors and evaluate the user.
