Lateralization and cognitive systems Sebastian Ocklenburg,Christian Beste,Onur Gunturkun, Marco Hirnstein,2015-02-24 Left right asymmetries of structure and function are a common organization principle in the brains of humans and non human vertebrates alike While there are inherently asymmetric systems such as the human language system or the song system of songbirds the impact of structural or functional asymmetries on perception cognition and behavior is not necessarily limited to these systems For example performance in experimental paradigms that assess executive functions such as inhibition planning or action monitoring is influenced by information processing in the bottom up channel Depending on the type of stimuli used one

hemisphere can be more efficient in processing than the other and these functional cerebral asymmetries have been shown to modulate the efficacy of executive functions via the bottom up channel We only begin to understand the complex neuronal mechanisms underlying this interaction between hemispheric asymmetries and cognitive systems Therefore it is the aim of this Research Topics to further elucidate how structural or functional hemispheric asymmetries modulate perception cognition and behavior in the broadest sense

Technical Books in Print ,1964 *Comprehensive Handbook of Childhood Cancer and Sickle Cell Disease* Ronald T. Brown,2006-04-06 Over recent decades tremendous advances in the prevention medical treatment and quality of life issues in children and adolescents surviving cancer have spawned a host of research on pediatric psychosocial oncology This important volume fulfills the clear need for an up to date comprehensive handbook for practitioners that delineates the most recent research in the field the first of its kind in over a decade Over 60 renowned authors have been assembled to provide a thorough presentation of the state of the art research and literature with topics including Neuropsychological effects of chemotherapy and radiation therapy Bone marrow transplantation Important issues about quality of life during and following treatment Collaborative research among child focused psychologists Standards of psychological care for children and adolescents Stress and coping in the pediatric cancer experience The role of family and peer relationships The Comprehensive Handbook of Childhood Cancer and Sickle Cell Disease represents both multidisciplinary and international efforts an alliance between physicians and parents and a combination of research and service With a wealth of information of great interest to patients and their families this volume will also be a welcome resource to the psychologists psychiatrists pediatricians oncologists nurses and social workers who confront these issues as they help children and their families through the treatment recovery and grieving processes
