14th International Conference on Hand-Arm Vibration Deutsche Gesetzliche Unfallversicherung (DGUV), 2019-05-30 In May 2019 the Institut für Arbeitsschutz der Deutschen Gesetzlichen Unfallversicherung IFA was hosting the 14th International Conference on Hand-Arm Vibration. The event is organised every four years under the auspices of international expert bodies at changing places. It is aimed at all stakeholders in the subject, whether experts from the occupational safety and health and research communities or management personnel in the areas of manufacture and design. Mechanized manual work is often associated with exposure to vibration that may impact adversely upon the health and well-being of the affected individuals. Besides impairments to comfort and performance, harm to the hand-arm system, possibly permanent, must be prevented as a matter of priority. In a world of work that is becoming more and more complex, combined exposures are also becoming increasingly relevant. What influence does hand-arm vibration have in conjunction with noise or whole-body vibration? What contribution can be made by medicine, diagnostics, epidemiology, measurement technology and prevention to the identification and containment of risks and better still to their elimination? What is the role of international regulatory activity in this context? The 14th International Conference on Hand-Arm Vibration aimed to address these and many other questions concerning hand-arm vibration and to find answers relevant to the field.

Wave-Induced Particle Motions in the Ocean Henrik Kalisch,Ton Van Den Bremer,John Carter, Nick Pizzo,Yan Li,2025-01-22 Surface gravity waves at the surface of a fluid induce mass transport at the surface and in the fluid column below Possibly the earliest result was given by Stokes who showed that periodic surface gravity waves induce a small forward drift the Stokes drift corresponding to the Lagrangian mean wave induced drift of an infinitesimally small tracer in the absence of Eulerian mean flows While Stokes s result is a clear cut result on a second order effect associated with linear waves wave induced particle motions in the ocean are far more complex in reality Wave induced particle motions can also arise because of Eulerian mean flows driven by wave groups in the turbulent surface boundary layer subsurface flows wave breaking infragravity waves the Earth s rotation and the inertial dynamics of the particle itself

The Applications of New Multi-Locus GWAS Methodologies in the Genetic Dissection of Complex Traits Yuan-Ming Zhang,Zhenyu Jia,Jim M Dunwell,2019-06-19 Genome Wide Association Studies GWAS are widely used in the genetic dissection of complex traits Most existing methods are based on single marker association in genome wide scans with population structure and polygenic background controls To control the false positive rate the Bonferroni correction for multiple tests is frequently adopted This stringent correction results in the exclusion of important loci especially for GWAS in crop genetics To address this issue multi locus GWAS methodologies have been recommended i e FASTmrEMMA ISIS EM BLASSO mrMLM FASTmrMLM pLARmEB pKWmEB and FarmCPU In this Research Topic our purpose is to clarify some important issues in the application of multi locus GWAS methods Here we discuss the following subjects First we discuss the advantages of new multi locus GWAS methods over the widely used single locus GWAS methods in the genetic dissection of complex traits metabolites and gene expression levels Secondly large experiment error in the field measurement of phenotypic values for complex traits in crop genetics results in relatively large

P values in GWAS indicating the existence of small number of significantly associated SNPs To solve this issue a less stringent P value critical value is often adopted i.e. $0.001/0.0001$ and $1/m$ is the number of markers Although lowering the stringency with which an association is made could identify more hits confidence in these hits would significantly drop In this Research Topic we propose a new threshold of significant QTN LOD 3.0 or P value 2.0×10^{-4} in multi locus GWAS to balance high power and low false positive rate Thirdly heritability missing in GWAS is a common phenomenon and a series of scientists have explained the reasons why the heritability is missing In this Research Topic we also add one additional reason and propose the joint use of several GWAS methodologies to capture more QTNs Thus overall estimated heritability would be increased Finally we discuss how to select and use these multi locus GWAS methods

Studies on Life at the Energetic Edge - from Laboratory Experiments to Field-Based Investigations, Volume II Mark Alexander Lever, Bo Barker Jorgensen, Jan Amend, Victoria Orphan, Tori Hoehler, 2024-01-16 In collaboration with Microenergy 2022 The 4th International Workshop on Microbial Life under Extreme Energy Limitation we are proud to launch Volume II of Studies on Life at the Energetic Edge from Laboratory Experiments to Field Based Investigations This workshop focuses on the energy controls on microbial life and the exploration of the biological demand for energy Genetic adaptations and phenotypic traits that enable

microorganisms to tolerate long periods of energy limitation have attracted broad scientific interest in recent years Laboratory based cultivation experiments have shown that the potential to survive weeks to months in the absence of energy inputs occurs across a phylogenetically wide range of microbes Studies on natural environments have shown that energy limitation is pervasive across most habitats on Earth from highly metabolically active surface habitats to subsurface environments that have been cut off from new energy inputs for thousands of years Yet much remains to be learned about the evolutionary adaptations and life history traits that enable microorganisms to live under low energy conditions Similarly the spectrum of energy sources and metabolisms that enable and support life on Earth and potentially elsewhere in the Universe is far from constrained

Recent Advances in Acidophile Microbiology: Fundamentals and Applications D. Barrie Johnson,Axel Schippers,2017-05-19 There is considerable interest in pure and applied studies of extremophilic microorganisms including those acidophiles that are active in low pH environments As elsewhere in microbiology this is a fast developing field and the proposed special issue of Frontiers highlights many of the more recent advances that have been made in this area Authors from leading scientific groups located in North and South America Australasia and Europe have contributed to this e book and the topics covered include advances in molecular biochemical biogeochemical and industrial aspects of acidophile microbiology

ROS Regulation during Plant Abiotic Stress Responses Zhulong Chan,Chun-Peng Song,Woe Yeon Kim,Ken Yokawa,2017-02-08 Plants are continuously exposed to a wide range of environmental conditions including cold drought salt heat which have major impact on plant growth and development To survive plants have evolved complex physiological and biochemical adaptations to cope with a variety of adverse environmental stresses Among them reactive oxygen species ROS are key regulators and play pivotal roles during plant stress responses which are thought to function as early signals during plant abiotic stress responses ROS were long regarded as unwanted and toxic by products of physiological metabolism However ROS are now recognized as central players in the complex signaling network of cells Therefore a fine tuning control between ROS production and scavenging pathways is essential to maintain non toxic levels in

planta under stressful conditions through enzymatic and non enzymatic antioxidant defense systems We focus on the roles of ROS during plant abiotic stress responses in this Research Topic Plant responses to multiple abiotic stresses and effects of hormones and chemicals on plant stress responses have been carefully studies Although functions of several stress responsive genes have been characterized and possible interactions between hormones and ROS are discussed future researches are needed to functionally characterize ROS regulatory and signaling transduction pathways *Process Data in Educational and Psychological Measurement, 2nd Edition* Hong Jiao,Qiwei He,Bernard Veldkamp,2021-12-13 Publisher s note In this 2nd edition The following article has been added Jiao H He Q and Veldkamp BP 2021 Editorial Process Data in Educational and Psychological Measurement Front Psychol 12 793399 doi 10 3389 fpsyg 2021 793399 The following article has been added Reis Costa D Bolsinova M Tijmstra J and Andersson B 2021 Improving the Precision of Ability Estimates Using Time On Task Variables Insights From the PISA 2012 Computer Based Assessment of Mathematics Front Psychol 12 579128 doi 10 3389 fpsyg 2021 579128 The following article has been removed Minghui L Lei H Xiaomeng C and Potm ilc M 2018 Teacher Efficacy Work Engagement and Social Support Among Chinese Special Education School Teachers Front Psychol 9 648 doi 10 3389 fpsyg 2018 00648 **Proceedings of the 21st International Conference on Industrial Engineering and Engineering Management 2014** Ershi Qi,Jiang Shen,Runliang Dou,2015-01-06 Being the premier forum for the presentation of new advances and research results in the fields of Industrial Engineering IEEM 2014 aims to provide a high level international forum for experts scholars and entrepreneurs at home and abroad to present the recent advances new techniques and applications face and face to promote discussion and interaction among academics researchers and professionals to promote the developments and applications of the related theories and technologies in universities and enterprises and to establish business or research relations to find global partners for future collaboration in the field of Industrial Engineering All the goals of the international conference are to fulfill the mission of the series conference which is to review exchange summarize and promote the latest achievements in the field of industrial engineering and engineering management over the past year and to propose prospects and vision for the further development *Insights in Intensive Care Cardiovascular Medicine: 2022* Marija Vavlukis ,Fabio Guarracino,2024-08-16 We are now entering the third decade of the 21st century and especially in the last few years the achievements made by researchers have been exceptional This rapid development has led to major advancements in the fast growing field of intensive care cardiovascular medicine Frontiers have organised a series of Research Topics to highlight the latest advancements in research across the field of cardiovascular medicine This Research Topic is led by Prof Fabio Guarracino Specialty Chief Editor of intensive care cardiovascular medicine Together with Dr Marija Vavlukis this Research Topic will focus on new insights novel developments current challenges the latest discoveries and future perspectives **Pharmaceutical policy, impact and health outcomes** Hye-Young Kwon,Brian Godman,2023-03-17
