sophrologie Thierry Loussouarn, 2002-01-01 A mi chemin entre la relaxation l'hypnose le training autogène et le biofeedback la sophrologie est tout la fois une technique et une philosophie dont le but essentiel est l'épanouissement de l'être et la transformation positive de son existence Chacun de nous possède en lui les ressources et les moyens nécessaires à sa guérison son épanouissement et sa réalisation la sophrologie permet la remontée de ces aptitudes et facultés du subconscient au conscient elle est aujourd'hui utilisée avec succès en thérapie en médecine préventive et en pédagogie Elle vise rendre l'homme indépendant créer une conscience positive pour l'amener devenir le propre artisan de son bien-être et de sa croissance La réussite et l'épanouissement dépendent très largement de la qualité de nos pensées et de notre capacité d'apprendre positivement la vie la chance apparaît alors plus comme le résultat d'un état mental fort et déterminé que comme le fruit du hasard ou de la fatalité Ce livre pratique recueil d'exercices progressifs vous présente un enchaînement de diverses techniques accessibles tous d'écrites avec précision et réalisables par chacun seul et chez soi elles ont largement fait la preuve de leur efficacité et ont été l'objet de nombreuses expériences scientifiques La relaxation musculaire permettant la redécouverte de notre corps La sophronisation qui nous ouvre les portes du contrôle motionnel La détente mentale profonde qui nous libère du stress et des tensions Les exercices de visualisation positive qui imprègnent puissamment notre subconscient et modifient nos comportements les plus négatifs L'autosuggestion dirigée axe vers la dynamisation du positif L'art de s'endormir bien dormir et protéger notre sommeil La relaxation dynamique qui affine la perception de notre corps et nous apprend très vite rituellement ici et maintenant Les exercices d'enracinement qui renforcent notre détermination Nous savons que l'homme ordinaire n'exploite qu'environ 4 % des potentialités de son cerveau grâce à un contrôle mental correct dont la sophrologie est l'une des principales clés chacun peut augmenter considérablement ce pourcentage et créer en lui de nouveaux comportements d'autonomie et de responsabilité d'indépendance et de recherche d'harmonie sentiments généralement dénués d'une énergie considérable et points de départ d'une nouvelle vie féconde heureuse emplie de bien-être de paix et d'amour
