 Domínguez Soriano, Julián Ferrer Ruiz, 2021 **Theoretical and Experimental Studies on Novel High-Gain Seeded
 Free-Electron Laser Schemes** Chao Feng, 2015-12-18 This dissertation focuses on the study of novel high gain free electron
 laser FEL operation schemes with external seed lasers The technique of manipulating the phase space of the electron beam
 which is widely used in novel seeded FEL schemes is systematically studied Several novel FEL schemes are proposed for the
 generation of intense coherent FEL pulses with short wavelength sub femtosecond pulse length or multiple carrier frequency
 properties which meet the needs of FEL users Results of experiments are described for the recently proposed FEL schemes
 such as echo enabled harmonic generation and cascaded high gain harmonic generation New photon electron beam
 diagnostic methods are also developed for these experiments and future high gain FEL facilities **The Sacred and the
 Sinister** David J. Collins, S. J., 2019-03-20 Inspired by the work of eminent scholar Richard Kieckhefer The Sacred and the
 Sinister explores the ambiguities that made and make medieval religion and magic so difficult to differentiate The essays in
 this collection investigate how the holy and unholy were distinguished in medieval Europe where their characteristics
 diverged and the implications of that deviation In the Middle Ages the natural world was understood as divinely created and
 infused with mysterious power This world was accessible to human knowledge and susceptible to human manipulation
 through three modes of engagement religion magic and science How these ways of understanding developed in light of
 modern notions of rationality is an important element of ongoing scholarly conversation As Kieckhefer has emphasized
 ambiguity and ambivalence characterize medieval understandings of the divine and demonic powers at work in the world The
 ten chapters in this volume focus on four main aspects of this assertion the cult of the saints contested devotional
 relationships and practices unsettled judgments between magic and religion and inconclusive distinctions between magic and
 science Freshly insightful this study of ambiguity between magic and religion will be of special interest to scholars in the
 fields of medieval studies religious studies European history and the history of science In addition to the editor the
 contributors to this volume are Michael D Bailey Kristi Woodward Bain Maeve B Callan Elizabeth Casteen Claire Fanger
