Guide to the Law and Legal Literature of Spain Thomas W. Palmer (Jr.), 1915 **Current Catalog** National Library of Medicine (U.S.), 1966 Includes subject section name section and 1968 1970 technical reports Génesis y estructura de la teoría de la apariencia en Kant y Hegel Osvaldo Montero Salas, 2025-08-12 Este libro examina con profundidad y precisión una problemática clásica de la filosofía: la apariencia. Lejos de constituir un mero tema lateral, la apariencia se revela aquí como un problema estructural que atraviesa la metafísica moderna y con ella reas como la estética, el derecho y la ética. Immanuel Kant y G. W. F. Hegel cuyas obras han configurado decisivamente los modos contemporáneos de pensar ofrecen intervenciones cruciales en torno a este asunto. Sin embargo sus aportes no siempre han recibido la atención que merecen. Este estudio propone una reconstrucción sistemática de la teoría de la apariencia en ambos pensadores acudiendo a sus corpus teóricos. Tras una breve revisión histórica del problema se aborda la especificidad kantiana del tratamiento de este tema para luego explorar cómo Hegel transforma y radicaliza la problemática afianzando la idea de que la apariencia ha dejado de ser comprendida como una mera ilusión para devenir ahora en un momento constitutivo de lo real. Así esta obra no solo ilumina un eje poco transitado de la filosofía clásica alemana sino que ofrece claves conceptuales para repensar críticamente el estatuto de la realidad en la modernidad.

Handbook of Slope Stabilisation J. A. R. Ortigao, Alberto Sayao, 2013-03-09 This book is aimed at the practising engineer and engineering geologist working in tropical environments where landslides are mainly triggered by rain fall. This book is based on a similar work published in 1999 in Portuguese which became the Rio de Janeiro Slope Manual. This book is an engineering guide for the design of slopes and stabilisation works in rocks and residual soils. It evolves from the cumulative experience gathered by several engineers and geologists who faced severe slope problems. The authors' experience throughout Central and South America (Costa Rica, Argentina, Bolivia, Peru, Ecuador and Venezuela) and the Far East (especially Hong Kong and Malaysia) was used as a foundation for writing this book. The work also benefits enormously from the time spent in Hong Kong in 1996 and 1997 by the first editor on sabbatical at the City University of Hong Kong and the discussions he had with many colleagues from the Geotechnical Engineering Office (GEO) of the Hong Kong Government especially Dr A. Malone, Mr W. K. Pun, Dr A. Li, Mr K. Ho and Mr Y. C. Chan among others.
