School Resources, the Achievement Gap, and the Law David J. Armor,John R. Munich,Aron Malatinszky,2024-01-12 This book offers a novel and up to date exploration of the common belief that increasing conventional school resources will increase academic achievement and help close gaps between various advantaged and disadvantaged students Taking the scholarship around this question such as James S Coleman s 1965 report on the Equality of Educational Opportunity as a starting point it brings in an extensive range of contemporary data sources and statistical analysis to offer an updated robust and considered review of the issue Moving beyond these empirical questions it also explores how these empirical findings have been utilized in education adequacy litigation discussing the evolving law of adequacy cases while explaining the challenges of introducing complex data and analyses within a litigation framework Judges typically have little experience with the complexity of modern education data and the analyses required to

draw sound inferences It will thus be of interest to scholars researchers and faculty and jurists with expertise or interest in education policy the economics and sociology of education and public policy

Second Handbook of Research on Mathematics Teaching and Learning Frank K. Lester, 2007-02-01 The audience remains much the same as for the 1992 Handbook namely mathematics education researchers and other scholars conducting work in mathematics education This group includes college and university faculty graduate students investigators in research and development centers and staff members at federal state and local agencies that conduct and use research within the discipline of mathematics The intent of the authors of this volume is to provide useful perspectives as well as pertinent information for conducting investigations that are informed by previous work The Handbook should also be a useful textbook for graduate research seminars In addition to the audience mentioned above the present Handbook contains chapters that should be relevant to four other groups teacher educators curriculum developers state and national policy makers and test developers and others involved with assessment Taken as a whole the chapters reflects the mathematics education research community's willingness to accept the challenge of helping the public understand what mathematics education research is all about and what the relevance of their research findings might be for those outside their immediate community
