Mathematics N2 Memorandum Solutions:

On Non-Topological Solutions of the $A_{\{2\}}$ and $B_{\{2\}}$ Chern-Simons System Weiwei Ao, Chang-Shou Lin, Juncheng Wei, 2016-01-25 Click here to view the abstract Introduction Proof of Theorem 1.1 in the case Proof of Theorem 1.1 in the case Appendix Bibliography Almost Global Solutions of Capillary-Gravity Water Waves Equations on the Circle Massimiliano Berti, Jean-Marc Delort, 2018-11-02 The goal of this monograph is to prove that any solution of the Cauchy problem for the capillary gravity water waves equations in one space dimension with periodic even in space small and smooth enough initial data is almost globally defined in time on Sobolev spaces provided the gravity capillarity parameters are taken outside an exceptional subset of zero measure In contrast to the many results known for these equations on the real line with decaying Cauchy data one cannot make use of dispersive properties of the linear flow Instead a normal forms based procedure is used eliminating those contributions to the Sobolev energy that are of lower degree of homogeneity in the solution Since the water waves equations form a quasi linear system the usual normal forms approaches would face the well known problem of losses of derivatives in the unbounded transformations To overcome this after a parilinearization of the capillary gravity water waves equations we perform several paradifferential reductions to obtain a diagonal system with constant coefficient symbols up to smoothing remainders Then we start with a normal form procedure where the small divisors are compensated by the previous paradifferential regularization The reversible structure of the water waves equations and the fact that we seek solutions even in space guarantees a key cancellation which prevents the growth of the Sobolev norms of the solutions **Rudiments of Mathematics, Vol 2**, Bilinear Estimates in the Presence of a Large Potential and a Critical NLS in 3D Fabio Pusateri, Avy Soffer, 2024-08-19 View the abstract *U.S. Government Research & Development Reports*, 1970 *USA Through the Lens of Mathematics* Natali Hritonenko, Yuri Yatsenko, 2021-12-19 The main purpose of this captivating book is to help instructors in popularizing mathematics and other subjects by considering them in a unique multidisciplinary way This integrative technique contributes to innovative teaching strategies to improving students critical and problem solving skills and broadening their scientific vision and interdisciplinary knowledge The authors motivate the simultaneous learning of mathematics and social studies by telling the story of the United States of America in an original mathematically oriented way The readers will discover practical reasoning behind mathematical concepts This fascinating book exposes students to a novel educational strategy that aims to overcome fear of mathematics reduce mathematical anxiety and show the applicability of mathematics to everyday life and events It is unique among mathematical books in its devotion to present facts and stories from the country's heritage The collection of 325 informative problems is designed to fit any abilities background and taste Their solution requires only basic knowledge of algebra *Government Reports Announcements*, 1974 **Bibliography of Scientific and Industrial Reports**, 1965-07 Current Index to Journals in Education, Semi-Annual Cumulation, July-December, 1976, 1976-10 Scientific and Technical Aerospace
