Domination in Graphs: Core Concepts Teresa W. Haynes, Stephen T. Hedetniemi, Michael A. Henning, 2023-04-29 This monograph is designed to be an in depth introduction to domination in graphs It focuses on three core concepts domination total domination and independent domination It contains major results on these foundational domination numbers including a wide variety of in depth proofs of selected results providing the reader with a toolbox of proof techniques used in domination theory Additionally the book is intended as an invaluable reference resource for a variety of readerships namely established researchers in the field of domination who want an updated comprehensive coverage of domination theory next researchers in graph theory who wish to become acquainted with newer topics in domination along with major developments in the field and some of the proof techniques used and graduate students with interests in graph theory who might find the theory and many real world applications of domination of interest for masters and doctoral thesis topics The focused coverage also provides a good basis for seminars in domination theory or domination algorithms and complexity The authors set out to provide the community with an updated and comprehensive treatment on the major topics in domination in graphs And by Jove they've done it In recent years the authors have curated and published two contributed volumes Topics in Domination in Graphs 2020 and Structures of Domination in Graphs 2021 This book rounds out the coverage entirely The reader is assumed to be acquainted with the basic concepts of graph theory and has had some exposure to graph theory at an introductory level As graph theory terminology sometimes varies a glossary of terms and notation is provided at the end of the book

Combinatorics, Graph Theory and Computing Frederick Hoffman, Sarah Holliday, Zvi Rosen, Farhad Shahrokhi, John Wierman, 2024-06-15 This proceedings volume convenes selected revised papers presented at the 52nd Southeastern International Conference on Combinatorics Graph Theory and Computing SEICCGTC 2021 virtually held at Florida Atlantic University in Boca Raton USA on March 8-12 2021 As has been a tradition since its inception in 1970 this edition once more brought together mathematicians practitioners and scientists around novel findings in combinatorics graph theory and computing and their interactions The lectures and works presented at the Conference have proven to be of great interest to other scientists and analysts employing these mathematical sciences in their professional activities in business industry and government Such an environment promotes a better understanding of the roles of modern applied mathematics combinatorics and computer science Many works have demonstrated that disciplines have increasingly contributed to each other With this series of Conferences the gaps between the fields tend to decrease even further This volume is of particular interest for the community of pure and applied mathematicians in academia industry and government working in

combinatorics and graph theory as well as related areas of computer science and the interactions among these fields Its findings can also benefit a general audience of practitioners and students from related fields **Graph Theory** Ralucca Gera,Teresa W. Haynes,Stephen T. Hedetniemi,2018-10-26 This second volume in a two volume series provides an extensive collection of conjectures and open problems in graph theory It is designed for both graduate students and established researchers in discrete mathematics who are searching for research ideas and references Each chapter provides more than a simple collection of results on a particular topic it captures the reader s interest with techniques that worked and failed in attempting to solve particular conjectures The history and origins of specific conjectures and the methods of researching them are also included throughout this volume Students and researchers can discover how the conjectures have evolved and the various approaches that have been used in an attempt to solve them An annotated glossary of nearly 300 graph theory parameters 70 conjectures and over 600 references is also included in this volume This glossary provides an understanding of parameters beyond their definitions and enables readers to discover new ideas and new definitions in graph theory The editors were inspired to create this series of volumes by the popular and well attended special sessions entitled My Favorite Graph Theory Conjectures which they organized at past AMS meetings These sessions were held at the winter AMS MAA Joint Meeting in Boston January 2012 the SIAM Conference on Discrete Mathematics in Halifax in June 2012 as well as the winter AMS MAA Joint Meeting in Baltimore in January 2014 at which many of the best known graph theorists spoke In an effort to aid in the creation and dissemination of conjectures and open problems which is crucial to the growth and development of this field the editors invited these speakers as well as other experts in graph theory to contribute to this series **Combinatorial Algorithms** Charles J. Colbourn,Roberto Grossi,Nadia Pisanti,2019-07-15 This book constitutes the refereed post conference proceedings of the 30th International Workshop on Combinatorial Algorithms IWOCOA 2019 held in Pisa Italy in July 2019 The 36 regular papers presented in this volume were carefully reviewed and selected from 73 submissions They cover diverse areas of combinatorial algorithms complexity theory graph theory and combinatorics combinatorial optimization cryptography and information security algorithms on strings and graphs graph drawing and labelling computational algebra and geometry computational biology probabilistic and randomized algorithms algorithms for big data analytics and new paradigms of computation *Graph Drawing and Network Visualization* Fabrizio Frati,Kwan-Liu Ma,2018-01-25 This book constitutes revised selected papers from the 25th International Symposium on Graph Drawing and Network Visualization GD 2017 held in Boston MA USA in September 2017 The 34 full and 9 short papers presented in this volume were carefully reviewed and selected from 87 submissions Also included in this book are 2 abstracts of keynote presentations 16 poster abstracts and 1 contest report The papers are organized in topical sections named straight line representations obstacles and visibility topological graph theory orthogonal representations and book embeddings evaluations tree drawings graph layout designs point set embeddings special representations and beyond planarity Graph

Drawing Stephen Wismath, Alexander Wolff, 2013-12-02 This book constitutes the thoroughly refereed post conference proceedings of the 21st International Symposium on Graph Drawing GD 2013 held in Bordeaux France in September 2013. The 42 revised full papers presented together with 12 revised short papers, 3 invited talks and 1 poster description were carefully reviewed and selected from 110 submissions. The papers are organized in topical sections on upward drawings, planarity, beyond planarity, geometric representations, 3D et al, universality, practical graph drawing, subgraphs, crossings, geometric graphs and geographic networks, angular restrictions, grids, curves and routes. The book also contains a short description of the graph drawing contest.
