The way I used these MCAS Review PowerPoint in class is as follows. Starting about six weeks before the Biology MCAS I would have "MCAS Review Fridays". I divided the class into teams. I put a set of tables at the front of the classroom, with paper and pencils set out. Each student would take a turn coming up to the table. I would click the questions on the screen. We would go over the questions. I would explain how the state asked the questions, and what the students should look for. The students would write down the correct answer. If they got it right, the team would get a point. The team with the most points at the end of class would get some type of prize. I found that conducting the review in this manner made each student participate. This also gave me a fun way to review the concepts that the students would be tested on.

These reviews were extremely beneficial to my students. My student's pass rate exceeded that of students from other teachers at the school I worked at.
