Aviation Safety Law and Regulation Ruwantissa Abeyratne,2024-04-05 Human and technical factors play a major role
in the safety of aviation From the competency of the airline pilot to the design and manufacture of aircraft as well as how the
aircraft is operated there are compelling factors that a State must consider in implementing its safety management system
These elements are well regulated in Annex 1 Personnel Licensing Annex 2 Rules of the Air Annex 6 Operations of Aircraft
and Annex 8 Airworthiness of Aircraft to the Convention on International Civil Aviation Chicago Convention respectively The
overall philosophy of these Annexes is embodied in the broader principles contained in Annex 19 Safety Management
Systems This book contains commentaries on the relevant Standards of these Annexes that require legal and policy analysis
It begins with a treaty interpretation of the Chicago Convention and the Annexes as well as their amendment processes and
goes on to critically analyze the role of the International Civil Aviation Organization in that context It then lays out the
provisions of the four Annexes and offers legal and policy commentaries on Standards therein which are not self explanatory
where applicable relevant and necessary A significant feature of the book is its conclusion which asks questions and offers
point by point suggestions in response that States could benefit from in ensuring the safety of international civil aviation
There has been no previous book published containing critical analyses and commentaries on Annexes 2 6 8 and 19 to the
Chicago Convention in one repository of literature This book will be of interest and use to aeronautical authorities academics
students of international law and air law legal practitioners and regulators worldwide *The History and Future of Flight*
