edition these topical developments have been taken into consideration The organisation and layout of the first volume with its concise and detailed project documentation has been retained The authors introduce floor plan solutions using contemporary projects which bear in mind changing family structures At the same time the contributions provide an in depth introduction to planning single family houses from the design of the floor plan to useful tips for the realisation In addition to this fundamental information 22 projects are documented providing ideas and inspiration for planners students and clients The international selection of projects highlights current trends in planning and designing single family housing and reveals the tried and tested basics Housing, Urban Renewal and Socio-Spatial Integration Xiaoxi Hui,2013-02-07 This issue of A BE

addresses two critical urban issues China faces today housing and urban renewal In the recent two decades the Chinese urban housing stock underwent a significant if not extreme transformation From 1949 to 1998 the urban housing stock in China largely depended on the public sector and a large amount of public housing areas were developed under the socialistic public housing system in Beijing and other Chinese cities Yet in 1998 a radical housing reform stopped this housing system Thus most of the public housing stock was privatized and the urban housing provision was conferred to the market The radical housing privatization and marketization did not really resolve but intensified the housing problem Along with the high speed urbanization the alienated capitalized and speculative housing stock caused a series of social and spatial problems The Chinese government therefore attempted to reestablish the social housing system in 2007 However the unbalanced structure of the Chinese urban housing stock has not been considerably optimized and the housing problem is still one of the most critical challenges in China **Tall: the design and construction of high-rise architecture** Guy Marriage,2019-09-10

This is a guide to both the basics and the details of tall building design delving into the rudimentary aspects of design that an architect of a tall office building must consider as well as looking at the rationale for why and how a building must be built the way it is Liberally illustrated with clear simple black and white illustrations showing how the building structure and details can be built this book greatly assists the reader in their understanding of the building process for a modern office tower It breaks down the building into three main components the structure the core and the facade writing about them and illustrating them in a simple to understand manner By focusing on the nuts and bolts of real life design and construction it provides a practical guide and desk reference to any architect or architecture student embarking on a tall building project
