

Piping and instrumentation diagram

Un diagrama de tuberías e instrumentación (DTI) también conocido del idioma inglés como **piping and instrumentation diagram/drawing (P&ID)** es un diagrama que muestra el flujo del proceso en las tuberías, así como los equipos instalados y el instrumental.

Contenido y Función

Un diagrama de tuberías e instrumentación (DTI) o en inglés piping and instrumentation diagram/drawing (P&ID) está definido por el Instituto de Instrumentación y Control de la siguiente manera:

1. Un diagrama que muestra la interconexión de equipos de proceso e instrumentos utilizados para controlar el proceso. En la industria de procesos, un conjunto estándar de símbolos se utiliza para preparar los dibujos de los procesos. El instrumento de símbolos utilizados en estos dibujos se basa generalmente en Sistemas de Instrumentación y Automatización de la sociedad (ISA) Norma S.S. 1.
2. El principal esquema utilizado para la colocación de un proceso de control de la instalación.

Los DTI desempeñan un papel importante en el mantenimiento y modificación del proceso que describen. Es fundamental para demostrar la secuencia física de los equipos y sistemas, así como la forma en que estos sistemas de conexión. Durante la etapa de diseño, el esquema también proporciona la base para el desarrollo de sistemas de control del sistema, lo que permite aumentar la seguridad operacional y las investigaciones, como los estudios de peligros y operabilidad (HAZOP).

Para las instalaciones de procesamiento, es una representación pictórica de

- Instrumentos clave de las tuberías y los detalles
- Control y sistemas de cierre
- Seguridad y los requisitos reglamentarios
- Puesta en marcha e información operativa.
