

# "Flowers for Algernon" Summary

Flowers for Algernon is a story about a man named Charlie Gordon who has mental disabilities. Charlie often has trouble spelling words and understanding the world around him. For example, at the factory that he works at, his coworkers tease him, and he just goes along with it because he doesn't understand. Then came along a small white mouse named Algernon. Researchers developed a scientific surgery to increase someone's IQ. This surgery was then performed on the mouse. The test on Algernon ended up working. Then, this test was done on Charlie and it ended up working on him also.

Now both the mouse and Charlie were very smart, and Charlie had a chance to see what it was like to be a normal person and to be smart. Then the mouse ends up losing its smarts and its brain starts to deteriorate. The mouse soon then dies because of it. This mouse then starts to symbolize Charlie in which he was also losing his smarts.
