Xuanhe Catalogue of Paintings ,2019-05-31 Xuanhe Catalogue of Paintings is the first complete translation of the well known document produced at the court of Emperor Huizong r 1100 1125 Dated to 1120 the Catalogue is divided into ten categories of subject matter Under Daoist and Buddhist Subjects Figural Subjects Architecture Barbarian Tribes Dragons and Fish Landscape Domestic and Wild Animals Flowers and Birds Ink Bamboo and Vegetables and Fruit are biographies of 231 painters ranging from famous early masters such as Wu Daozi ca 685 758 and Li Cheng 919 967 to otherwise unknown artists of the Song dynasty court including fourteen eunuch officials and sixteen male and female members of the royal family Titles of their pictures held in the palace collection are listed for each artist These 6 396 paintings testify to the visual culture experienced by viewers of the twelfth century The author s Introduction analyzes the Catalogue as a source of evidence about the formation of the Song dynasty palace collection and argues that the majority of its pictures were already in the collection before Huizong s reign as a result of conquest confiscation tribute gift culture collecting by earlier emperors and the production of academy artists and regular officials at the Song court Under Huizong s reign around a thousand other pictures were added to the Catalogue through acquisition and reattribution Open access edition funded by the National Endowment for the Humanities

Great Graph Art Cindi Mitchell,2000-09-06 Kids will love creating their own graph art designs while practicing decimals and fractions First they solve a series of math problems and plot the answers on a graph When they connect the points a mystery emerges *Discovering Computer Science* Jessen Havill,2020-10-12 Havill s problem driven approach introduces algorithmic concepts in context and motivates students with a wide range of interests and backgrounds Janet Davis Associate Professor and Microsoft Chair of Computer Science Whitman College This book looks really great and takes exactly the approach I think should be used for a CS 1 course I think it really fills a need in the textbook landscape Marie desJardins Dean of the College of Organizational Computational and Information Sciences Simmons University *Discovering Computer Science* is a refreshing departure from introductory programming texts offering students a much more sincere introduction to the breadth and complexity of this ever growing field James Deverick Senior Lecturer The College of William and Mary This unique introduction to the science of computing guides students through broad and universal approaches to problem solving in a variety of contexts and their ultimate implementation as computer programs Daniel Kaplan DeWitt Wallace Professor Macalester College *Discovering Computer Science Interdisciplinary Problems Principles and Python Programming* is a problem oriented introduction to computational problem solving and programming in Python appropriate for a first course for computer science majors a more targeted disciplinary computing course or at a slower pace any introductory computer science course for a general audience Realizing that an organization around language features only resonates with a narrow audience this textbook instead connects programming to students prior interests using a range of authentic problems from the natural and social sciences and the digital humanities The

presentation begins with an introduction to the problem solving process contextualizing programming as an essential component Then as the book progresses each chapter guides students through solutions to increasingly complex problems using a spiral approach to introduce Python language features The text also places programming in the context of fundamental computer science principles such as abstraction efficiency testing and algorithmic techniques offering glimpses of topics that are traditionally put off until later courses This book contains 30 well developed independent projects that encourage students to explore questions across disciplinary boundaries over 750 homework exercises and 300 integrated reflection questions engage students in problem solving and active reading The accompanying website <https://www.discoveringcs.net> includes more advanced content solutions to selected exercises sample code and data files and pointers for further exploration
