Assessment in Geographical Education: An International Perspective Theresa Bourke, Reece Mills, Rod

Lane, 2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so

we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills

Handbook of Geography Education Sarah Witham Bednarz, Jerry T. Mitchell, 2025-01-27 This handbook presents a broad and comprehensive overview of research and practices in geography education at primary and secondary levels from birth to about age 18 It summarizes the current state of knowledge in this sub discipline of geography Including authors representative of many geography education traditions the book pays equal attention to learning and teaching and to respect student voices and includes rich in case studies evidence based research and specific examples It also emphasizes ways that geography education can contribute to global concerns about social justice diversity equity and inclusion as well as ways it can help to prepare the next generation of informed critical and reflective members of societies The book is divided into five sections Purposes of geography education Why is it taught Perspectives on geography education What is taught Practices of geography education How is it organized and taught Preparation of geography educators How are geography educators prepared Possibilities for geography education What is are the future s of geography education By providing broad perspectives and lively and accessible writing this handbook is a useful tool for novice geography educators teacher educators educational policy makers support staff such as librarians and media resource specialists curriculum developers and assessment experts in many world regions

Economic Geography Wallace Walter Atwood, 1927 **Indigenous Teaching Disciplines and Perspectives for Higher Education** Kgari-Masondo, Maserole Christina, 2025-03-28 Literature indicates that sociolinguists and educationists often claim multilingual practice and Africanizing and Indigenizing education will jeopardize national unity and

social cohesion Such claims delay the implementation of decolonization policies and the transformation of the curriculum under false assumptions However research reveals many Indigenous students struggle with higher educational content which is often presented through languages that are unfamiliar to them This implies that there is a need to uncover resources that can assist in necessitating the implementation of Indigenous education globally and that all multilingual strategies in education must be based on quality mother tongue illustrative content as its foundation As a result further research on the subject is necessary to enhance teaching strategies that reach all Indigenous students Indigenous Teaching Disciplines and Perspectives for Higher Education illustrates the need for the implementation of a decolonized teaching and learning curriculum with integrated resources as models It explores how to improve Indigenous knowledge content and teaching methods Covering topics such as cultural identity African research methodology and Indigenous media this book is an excellent resource for teachers policymakers school administrators researchers scholars academicians and more The Eclectic Teacher and Kentucky School Journal ,1876 *Resources in Education* ,1992
