*Innovation for Sustainable Development* Jean-Yves Grosclaude, Rajendra K. Pachauri, Laurence Tubiana, 2014-02-20

Innovation has become the new buzzword across the globe. International organisations, governments, corporates, academia and society see it as the answer to the major economic, social and environmental transformations challenging the models of the 20th century. Innovations are occurring worldwide and alternative solutions to the existing problems are emerging in all sectors. Electric cars, organic farming, renewable energy and e-learning are good examples. These alternatives can be ascribed with qualities such as decentralized, frugal, flexible, smart and democratic virtues that are lacking in conventional models. They are attributed with the potential to meet the overall global challenges such as climate change and the growing inequalities between and within countries. What is the real potential of innovation? Does the rapid deployment of innovations lead towards a more sustainable and inclusive society? Can innovations and the emerging alternatives replace conventional models? Beyond technologies, what institutional innovations are required to support sustainable development? *A Planet for Life 2014* aims to answer these questions and explore innovation in all its aspects through a series of texts written by international experts. The objective of this book is to analyse experiences from across the world and the role of innovation in a variety of areas of development such as urbanization, agriculture and food, the mobility of people and freight, education and the provision of water and energy to all.

*Internet Finance in China* Ping Xie, Chuanwei Zou, Haier Liu, 2015-12-14. This book is about internet finance, a concept coined by the authors in 2012. Internet finance deals specifically with the impacts of internet-based technologies such as mobile payments, social networks, search engines, cloud computation and big data on the financial sector. Major types of internet finance include third-party payments and mobile payments, internet currency, P2P lending, crowdfunding and the use of big data in financial activities. Internet finance is highly popular and heavily discussed in China. Chinese Premier Li Keqiang made the healthy development of internet finance a policy priority in 2014 state of union address. This book as a detailed report on internet finance in China will help readers understand the status quo and development of China's financial system.
