Human Geo 22 May 2014 Mark Scheme:

Time for mapping Sybille Lammes,Chris Perkins,Alex Gekker,Sam Hind,Clancy Wilmott,Daniel Evans,2018-06-29 Maps take place in time as well as representing space The Google map on your smartphone appears to fix the world serving as a practical spatial tool but in practice is deployed in ways that draw attention to memories rhythm synchronicity sequence and duration This interdisciplinary collection focuses on how these temporal aspects of mapping might be understood at a time when mapping technologies have been profoundly changed by digital developments It contrasts different aspects of this temporality bringing together experts from critical cartography media studies and science and technology studies Together the chapters offer a unique interdisciplinary focus revealing the complex and social ways in which time is wrapped up with digital technologies and revealed in everyday mapping tasks from navigating across cities to serving as scientific groundings for news stories from managing smart cities to visual art practice It brings time back into the map An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence [Handbook of the Politics of the Arctic](#) Leif Christian Jensen,Geir Hønneland,2015-09-25 The Arctic has again become one of the leading issues on the international foreign policy agenda in a manner unseen since the Cold War Drawing on the perspectives of geo politics and international law this Handbook offers fresh insights and perspectives on the most pressing issues grouped under the headings of political ascendancy climate and environmental issues resources and energy and the response and policies of affected countries

The Economics of Biofuels Stefania Bracco,2016-06-17 Biofuels are a renewable source of energy used mainly for transportation They link together food energy and natural resources sectors and involve ecological social and inequality issues They are an emblematic example of the interactions between economic environmental social and political decisions and as a recent and complex issue require updated and detailed information to be understood This book aims to shed light on several economic social and environmental issues connected to biofuel production and policies The Economics of Biofuels adopts detailed descriptions rigorous data analysis and precise econometric methods to estimate the effects of biofuel on different socio economic factors avoiding complicated and sometimes ineffective models based on context specific parameters In particular the book focuses on the impact of bioenergy policy on biocommodity production and trade and on the related phenomenon of land acquisitions to grow biofuel commodities The book's main findings are derived by an original and unique dataset collecting information on the investors acquiring land in Africa and on the voluntary standard certification and labelling schemes adopted by them as Corporate Social Responsibility CSR strategy The analysis links together in an original way public and private initiatives to make biofuel sustainable Therefore this book represents an improvement in the understanding of biofuel production and policy's sustainability This book is of interest to those who study environmental economics agricultural economics and sustainable development It is also suitable for those in the renewable energy sector with a particular focus on biofuel sustainability *Planning for a Material World* Laura Lieto,Robert

Beauregard,2015-11-06 Today urban scholars think of cities and regions as evolving through networks of human associations technologies and natural ecologies This being the case planners are faced with the task of navigating a profoundly material world Planning with and for humans alone is unacceptable in the unfolding of urban processes non human things cannot be ignored This inclusive vision has consequences for how planners envision the connections among norms technologies and life worlds as well as how they design and implement their plans The contributors to this volume utilize a variety of examples ecologically sensitive regional planning in Naples Italy congestion pricing in New York City and public participation in Europe among others to explore how planners engage a heterogeneous and restless world Inspired by assemblage thinking and actor network theory each chapter draws on this new materialism to acknowledge in quite pragmatic ways that spatial politics is a process of becoming that is inseparable from the materiality of urban practices A Gendered Approach to the Syrian Refugee Crisis Jane Freedman,Zeynep Kivilcim,Nurcan Özgür Baklacioğlu,2017-02-24 The refugee crisis that began in 2015 has seen thousands of refugees attempting to reach Europe principally from Syria The dangers and difficulties of this journey have been highlighted in the media as have the political disagreements within Europe over the way to deal with the problem However despite the increasing number of women making this journey there has been little or no analysis of women s experiences or of the particular difficulties and dangers they may face A Gendered Approach to the Syrian Refugee Crisis examines women s experience at all stages of forced migration from the conflict in Syria to refugee camps in Lebanon or Turkey on the journey to the European Union and on arrival in an EU member state The book deals with women s experiences the changing nature of gender relations during forced migration gendered representations of refugees and the ways in which EU policies may impact differently on men and women The book provides a nuanced and complex assessment of the refugee crisis and shows the importance of analysing differences within the refugee population Students and scholars of development studies gender studies security studies politics and middle eastern studies will find this book an important guide to the evolving crisis Geographical Data Science and Spatial Data Analysis Lex Comber,Chris Brunsdon,2020-12-02 We are in an age of big data where all of our everyday interactions and transactions generate data Much of this data is spatial it is collected some where and identifying analytical insight from trends and patterns in these increasing rich digital footprints presents a number of challenges Whilst other books describe different flavours of Data Analytics in R and other programming languages there are none that consider Spatial Data i e the location attached to data or that consider issues of inference linking Big Data Geography GIS Mapping and Spatial Analytics This is a learning by doing textbook building on the previous book by the same authors An Introduction to R for Spatial Analysis and Mapping It details the theoretical issues in analyses of Big Spatial Data and developing practical skills in the reader for addressing these with confidence **The Map in the Machine** Luis F. Alvarez Leon,2024-04-30 Digital technologies have changed how we shop work play and communicate reshaping our societies and economies To understand digital capitalism we need to grasp how advances in

geospatial technologies underpin the construction operation and refinement of markets for digital goods and services In *The Map in the Machine* Luis F Alvarez Leon examines these advances from MapQuest and Google Maps to the rise of IP geolocation ridesharing and a new Earth Observation satellite ecosystem He develops a geographical theory of digital capitalism centered on the processes of location valuation and marketization to provide a new vantage point from which to better understand and intervene in the dominant techno economic paradigm of our time By centering the spatiality of digital capitalism Alvarez Leon shows how this system is the product not of seemingly intangible information clouds but rather of a vast array of technologies practices and infrastructures deeply rooted in place mediated by geography and open to contestation and change

China-Taiwan Rapprochement Min-Hua Chiang,2015-10-30 This book examines how since about 2008 the economy of Taiwan has become ever more deeply integrated into the economy of China It goes beyond a consideration of trade and investment flows and discusses also the large population flows the growing integration of the two financial systems and the nature of the deep economic integration at the industry and firm level It considers the impact of growing economic integration on society and politics assesses how China Taiwan economic integration is affecting the East Asian region more widely and explores the implications for international relations including the United States dominance in the region Overall the book presents a comprehensive analysis of all the issues
