Ipcc Practice Manual Nov 2015:

Recarbonizing global soils – A technical manual of recommended management practices Food and Agriculture

Organization of the United Nations, Intergovernmental Technical Panel on Soils, 2021-09-08 During the last decades soil organic carbon SOC attracted the attention of a much wider array of specialists beyond agriculture and soil science as it was proven to be one of the most crucial components of the earth's climate system which has a great potential to be managed by humans. Soils as a carbon pool are one of the key factors in several Sustainable Development Goals in particular Goal 15 Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification and halt and reverse land degradation and halt biodiversity loss with the SOC stock being explicitly cited in Indicator 15.3.1. This technical manual is the first attempt to gather in a standardized format the existing data on the impacts of the main soil management practices on SOC content in a wide array of environments including the advantages, drawbacks and constraints. This manual presents different sustainable soil management (SSM) practices at different scales and in different contexts supported by case studies that have been shown with quantitative data to have a positive effect on SOC stocks and successful experiences of SOC sequestration in practical field applications. Volume 6 includes 30 case studies dealing with forestry, wetlands and urban soils management.

Handbook of Cities and the Environment Kevin Archer, Kris Bezdecny, 2016-12-30

With an ever-growing majority of the world's human population living in city spaces, the relationship between cities and nature will be one of the key environmental issues of the 21st Century. This book brings together a diverse set of authors to explore the various aspects of this relationship both theoretically and empirically. Rather than considering cities as wholly separate from nature, a running theme throughout the book is that cities and city dwellers should be characterized as intrinsic in the creation of specifically urban-generated socio-natures.

Suspects' Rights in India Prejal Shah, 2021-09-30

This book examines the procedural, cultural and institutional framework of custodial interrogation in India. It explores theoretical and practical perspectives on custodial interrogation practices in India, which have been in urgent need for reform, and critiques the systemic failure on the part of the police in India to implement suspects' rights uniformly. This volume analyses the Indian framework of custodial interrogation to identify its fundamental flaws and emphasises on the need for having a lawyer present during custodial interrogation. Demonstrates significant evidence on state of suspects' rights in India through comparative law methodologies with a focus on common law scholarship and jurisprudence, more particularly England and Wales, and supplemented by vital empirical research through key interviews with related institutional parties. Discusses emerging seminal jurisprudence of the European Court of Human Rights on applications of the right to fair trial at the custodial interrogation stage, especially shedding light on modern applications of the right to legal assistance in England and Wales and radical Strasbourg-inspired reforms in other European jurisdictions. Highlights the right to legal assistance as one of the viable solutions to break the culture of police lawlessness at this critical stage of the criminal process. An
