## **Konstantin Melnikov And His House:**

**Konstantin Melnikov and His House** Fritz Barth, 2015 Konstantin Melnikov 1890 1974 is unquestionably one of the outstanding architects of the 20th century in spite of the fact that he fell silent early leaving behind only limited work that was insufficiently publicized and restricted almost exclusively to Moscow the city of his birth in which he spent nearly his entire life and which did not appreciate him He was raised in humble circumstances but enjoyed an excellent education 0 In the late 1920s at the peak of his career he had the opportunity to build a house for himself and his family in Moscow in which he was then able to live until the end of his life This house a memorable symbiosis of almost peasant like simplicity and extreme radicalness is one of the most impressive surprising and probably most enigmatic works produced by 20th century architecture Its simplicity is only outward in reality this is a highly complex work which links together the elements of architecture explicitly and inextricably which takes a clear and completely autonomous stand and which in a way that little else has done raises the question as to the nature of genuinely architectonic thinking In essayistic form the book attempts to follow the paths laid out in the architect's work from the perspective of an architect **The Melnikov House, Moscow (1927 - 1929)** Juhani Pallasmaa, Andrei Gozak, 1996-09-12 Detailed documentation of this unique house renowned for its interlocking circle design *The Melnikov House* Pavel Kuznetsov, 2017-06 The Melnikov House a building designed by architect Konstantin Melnikov in Moscow for his family 1927 1929 is an icon of the architectural avant garde The house was originally built as an experimental cylindrical house to test out Konstantin Melnikov's very own concept of mass construction of residential estates This book covers the house in its current condition during its transformation from a family home to the State Melnikovs Museum *Key Houses of the Twentieth Century* Colin Davies, 2006 Featuring over 100 of the most significant and influential houses of the twentieth century For each of the houses included there are numerous accurate scale plans showing each floor together with elevations sections and site plans where appropriate All of these have been specially drawn for this book and are based on the most up to date information and sources **Behind Architectural Filters** Miguel Guitart, 2022-03-24 Behind Architectural Filters Phenomena of Interference explores the active role of architectural filters in generating physically and sensory charged spatial experiences The book addresses how the material and the psychological strategies of permeable physical boundaries determine our perceptual experiences of the spaces we occupy This book explores architectural filters as connecting mechanisms capable of conjuring unique atmospheres that integrate the participation of several agents The text analyzes ten case studies grouped under five generative parameters origin density thickness function and message Each study investigates the main aspects of the filters internal genesis and the character of the spaces informed by them The cases illustrate a broad geographic cultural and historical scope and connect past tradition with contemporary design This methodology considers a historical and philosophical standpoint addressing vernacular constructive sustainable and sensory considerations Written for students and scholars of architectural history theory art

design and philosophy Behind Architectural Filters Phenomena of Interference offers an unprecedented perspective on the production of spatial atmospheres bridging past and present while connecting thought and practice in a highly visual study Chapter 3 of this book is available for free in PDF format as Open Access from the individual product page at [www.routledge.com](http://www.routledge.com) It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

***The New Urban House*** Jonathan Bell, Ellie Stathaki, 2018-11-13 A stunning anthology of contemporary houses that showcases the ways that architecture can respond to local urban challenges while enhancing modern city living Architects face many challenges when designing a modern urban house Environmental performance aesthetics technical logistics material concerns site constraints these are all considerations that have the potential to limit what architects can achieve but that also can inspire creative solutions In addition each city's history obstacles and opportunities influence local design approaches Superbly illustrated with 600 color images this expansive compendium offers fascinating insights into building modern houses on a local level Jonathan Bell and Ellie Stathaki have selected urban structures from around the world to serve as both exemplary solutions and standout works of art in Beijing and Mexico City Athens and Tokyo Los Angeles and Cape Town By examining buildings on six continents from both emerging architects and established studios such as Zaha Hadid Architects MVRDV and Johnston Marklee this stunning volume explores the many ways in which architecture can enhance the experience of dwelling in a modern city by responding to traditional styles and challenges of site and providing a broader understanding of place

***The Tragedy of Property*** Maxim Trudolyubov, 2018-08-08 Russian novels poetry and ballet put the country squarely in the European family of cultures and yet there is something different about this country especially in terms of its political culture What makes Russia different Maxim Trudolyubov uses private property as a lens to highlight the most important features that distinguish Russia as a political culture In many Western societies private property has acted as the private individual's bulwark against the state in Russia by contrast it has mostly been used by the authorities as a governance tool Nineteenth century Russian liberals did not consider property rights to be one of the civil causes worthy of defending Property was associated with serfdom and even after the emancipation of the serfs the institution of property was still seen as an attribute of retrograde aristocracy and oppressive government It was something to be destroyed and indeed it was in 1917 Ironically it was the Soviet Union that with the arrival of mass housing in the 1960s gave the concept of private ownership a good name After forced collectivization and mass urbanization people were yearning for a space of their own The collapse of the Soviet ideology allowed property to be called property but not all properties were equal You could own a flat but not an oil company which could be property on paper but not in reality This is why most Russian entrepreneurs register their businesses in offshore jurisdictions and park their money abroad This fresh and highly original perspective on Russian history will be of great interest to anyone who wants to understand Russia today
