International Taxation of Energy Production and Distribution John Abrahamson, 2018-04-20. Energy is a major global industry with rapid ongoing changes in areas such as carbon taxes, emissions trading regimes and the development of renewable energy. The cross border nature of the industry calls for the thorough expert and up to date analysis provided in this timely and practical book. Taking a down to earth problem solving approach to policy and practice in the field worldwide, the author focuses on the international tax framework and the tax regimes in leading energy producing and consuming countries. The book introduces and analyses significant international tax issues related to energy production and distribution extending from the tax regime in the country where the oil, gas or coal exploration and production activities are located through to cross border transportation using pipelines, tankers and bulk carriers to the taxation of power stations and electricity transmission and distribution networks. The taxation issues covered include the following: upstream oil and gas and mining taxes, incentives for renewable energy, carbon taxes and emission trading regimes, dividend interest and royalty flows, foreign tax credits, permanent establishments, mergers and acquisitions, taxation issues for derivatives and hedging, transfer pricing, regional purchasing, marketing service and intangible property structures, free trade agreements and customs unions, dispute resolution and tax administration and risk management. Detailed updates are included on the most recent international tax developments affecting the energy industry including the OECD Action Plan on Base Erosion and Profit Shifting (BEPS) and the 2017 OECD Transfer Pricing Guidelines. Case studies offer an opportunity to apply international tax analysis to specific examples and gain practice in identifying and discussing relevant international taxation issues. This book will be of significant value to corporate tax managers and in house counsel together with accountants, lawyers, economists, government officials and academics connected with the energy industry and related international taxation issues.

Raffaele Petruzzi,Michael Lang,2022-01-13 Information Law Series 48 About this book Imposing Data Sharing among Private Actors is a vital book shedding light on the nature of certain economic and societal balancing exercises required for any compulsory business to business B2B data sharing initiatives because data sharing involves both benefits and potential costs While the economic value originating from data sharing seems evident identifying the legal framework to be applied to it is a challenge This is due to the multiple claims and rights aimed at controlling accessing or benefiting from data processing What s in this book Whether these initiatives pursue economic societal or empowerment objectives their potential benefits must be balanced with the following three considerations that are extensively investigated in the book the economic interests of the data holder personal data protection considerations and long term and collective costs in terms of individual autonomy The analysis elucidates how these aspects have been factored into existing compulsory B2B data sharing initiatives so far

particularly in Europe and on how they may be used as a source of inspiration in future initiatives. Insightful suggestions on the implementation of these balancing exercises conclude the volume. How this will help you. Based on law and literature in competition, personal data protection and intellectual property, the book greatly highlights the necessary balances underlying compulsory B2B data sharing and raises awareness about the crucial need to take the risks involved into consideration. It will be highly appreciated by policymakers, academics and private actors interested in issues linked to competition law in the digital environment, regulation of platforms, data governance or the interaction between competition law and personal data protection law.

China's Rise In Mainland Asean: Regional Evidence And Local Responses Suthiphand Chirathivat, Buddhagarn Rutchatorn, Wasutadon Nakawiroj, 2020-09-28. In today's rapid rise and expansion of China's influence all around the world and in ASEAN during the past two decades, there has been an increasing awareness of various countries and regions adjusting themselves to the new trends, both in terms of opportunities and risks alike. This has become necessary due to the rapid changes in many aspects: political landscapes, economic issues as well as social and cultural considerations. This book, *China's Rise in Mainland ASEAN: Regional Evidence and Local Responses*, provides timely insights on some of the latest issues pertaining to ASEAN and China's rapidly shifting interactions and upcoming geostrategic challenges. ASEAN can be said to be undergoing a new era with China becoming more intertwined and involved with the ASEAN region than ever before. The complexity of the regional dynamics means that this phenomenon cannot be captured with a single narrative or discipline of study. In addressing the matters at hand, this book sets out to examine and provide deeper understandings on the regional implications and local responses from ASEAN countries and from the perspective of the region as a whole. The underlying rationale is that adequate understanding on the matters involved in this new ASEAN-China era will help to encourage better and mutually beneficial relationships between both sides. The analysis of this book will be categorized into four main themes: 1. The Big Picture concerning China's policies, strategies and diplomatic stances; 2. Implications and Responses dealing with how ASEAN members react and respond to China's actions and regional influence; 3. Perspectives on Trade, Investment and External Debt which handles the economic facets of the ASEAN-China interactions; and 4. Connectivity in Focus addressing various emerging and existing dimensions of connectivity expansion between ASEAN and China, both physical and virtual.
