Testing and Assessment Great Britain. Parliament. House of Commons. Children, Schools and Families Committee, 2008 A certain amount of national testing at key points in a child's school career is necessary in order to provide a standardised means of measuring educational attainment But in recent years the Government has emphasised central control of the education system through testing and associated targets and performance tables placing test results in a new and more complex context with wide ranging consequences National test results are used for a wide variety of purposes across many different levels national local institutional and individual Is the current national testing system a valid means by which to achieve these purposes The Committee concludes that in some cases it is not In particular the use of national test results for the purpose of school accountability has resulted in some schools emphasising the maximisation of test results at the expense of a more rounded education for their pupils A variety of classroom practices aimed at improving test results has distorted the education of some children which may leave them unprepared for higher education and employment Teaching to the test and narrowing of the taught curriculum are widespread phenomena in schools resulting in a disproportionate focus on the core subjects of English mathematics and science The Government's proposals for the new single level tests and the new emphasis on the personalised approach to learning may have some positive effects But there is a need for structural modification of the current approach The Committee concludes that the national testing system should be reformed to decouple these multiple purposes in such a way as to remove from schools the imperative to pursue test results at all costs On the 14 19 diplomas the Committee notes that teachers feel unprepared for the new qualifications and there is anxiety about the limited amount of training they are due to receive

2007 Key Stage 2 (KS2) QCA Sats Past Papers Maths, Science and English Tests, 2007 *Education Policy* Ian Abbott, Michael Rathbone, Phillip Whitehead, 2012-11-12 A splendid read Via interviews with several Secretaries of State for Education and a supporting analytical commentary Education Policy provides a fascinating insight and historical appraisal of English policy rationale Dr David Kitchener Reader

Starting Science...Again? Martin Braund,2008-10-09 The structure of this book encourages active participation via reflective activity boxes which further allows for the engagement and consolidation of ideas Evidence based research is cited resulting in the author suggesting a number of practical activities to encourage progression and continuity in science ESCalate Why do pupils learning and motivation slow down markedly as they move from primary to secondary school Why is this situation worse in science than in any other curriculum subject This book combines reports of and reflection on best practice in improving progression and continuity of teaching and learning in science particularly at that transition stage between primary and secondary school Presenting the views of teachers and pupils on progression learning and application of science the book suggests practical ways of improving teaching and learning in science Each chapter includes examples of learning materials with notes on how these might be used or adapted by teachers in their own classroom settings Science teaching in secondary schools is often based on assumptions that children know or can do very little so the job in the secondary school becomes one of showing pupils how to start doing science properly as if from scratch The damage that this false view can do to pupils learning motivation and confidence is clear This book will help teachers to assess children s prior knowledge effectively and build meaningful and enjoyable science lessons
