**Proceedings of AICCE'19** Fadzli Mohamed Nazri, 2019-11-28 This book gathers the latest research innovations and applications in the field of civil engineering as presented by leading national and international academics researchers engineers and postgraduate students at the AWAM International Conference on Civil Engineering 2019 AICCE 19 held in Penang Malaysia on August 21 22 2019 The book covers highly diverse topics in the main fields of civil engineering including structural and earthquake engineering environmental engineering geotechnical engineering highway and transportation engineering water resources engineering and geomatic and construction management In line with the conference theme Transforming the Nation for a Sustainable Tomorrow which relates to the United Nations 17 Global Goals for Sustainable Development it highlights important elements in the planning and development stages to establish design standards beneficial to the environment and its surroundings The contributions introduce numerous exciting ideas that spur novel research directions and foster multidisciplinary collaborations between various specialists in the field of civil engineering

**Evolutionary Computation & Swarm Intelligence** Fabio Caraffini, Valentino Santucci, Alfredo Milani, 2020-11-25 The vast majority of real world problems can be expressed as an optimisation task by formulating an objective function also known as cost or fitness function The most logical methods to optimise such a function when 1 an analytical expression is not available 2 mathematical hypotheses do not hold and 3 the dimensionality of the problem or stringent real time requirements make it infeasible to find an exact solution mathematically are from the field of Evolutionary Computation EC and Swarm Intelligence SI The latter are broad and still growing subjects in Computer Science in the study of metaheuristic approaches i.e. those approaches which do not make any assumptions about the problem function inspired from natural phenomena such as in the first place the evolution process and the collaborative behaviours of groups of animals and communities respectively This book contains recent advances in the EC and SI fields covering most themes currently receiving a great deal of attention such as benchmarking and tuning of optimisation algorithms their algorithm design process and their application to solve challenging real world problems to face large scale domains

**Range** David Epstein, 2021-04-27 The 1 New York Times bestseller that has all America talking with a new afterword on expanding your range as seen on CNN's Fareed Zakaria GPS Morning Joe CBS This Morning and more The most important business and parenting book of the year Forbes Urgent and important an essential read for bosses parents coaches and anyone who cares about improving performance Daniel H Pink Shortlisted for the Financial Times McKinsey Business Book of the Year Award Plenty of experts argue that anyone who wants to develop a skill play an instrument or lead their field should start early focus intensely and rack up as many hours of deliberate practice as possible If you dabble or delay you'll never catch up to the people who got a head start But a closer look at research on the world's top performers from professional athletes to Nobel laureates shows that early specialization is the exception not the rule David Epstein examined the world's most successful athletes artists musicians inventors

forecasters and scientists He discovered that in most fields especially those that are complex and unpredictable generalists not specialists are primed to excel Generalists often find their path late and they juggle many interests rather than focusing on one They re also more creative more agile and able to make connections their more specialized peers can t see Provocative rigorous and engrossing Range makes a compelling case for actively cultivating inefficiency Failing a test is the best way to learn Frequent quitters end up with the most fulfilling careers The most impactful inventors cross domains rather than deepening their knowledge in a single area As experts silo themselves further while computers master more of the skills once reserved for highly focused humans people who think broadly and embrace diverse experiences and perspectives will increasingly thrive

**Mathematics and Its Connections to the Arts and Sciences (MACAS)** Claus Michelsen, Astrid Beckmann, Viktor Freiman, Uffe Thomas Jankvist, Annie Savard, 2022-12-19 This book celebrates the 15th anniversary of the bi annual symposium series Mathematics and its Connections to the Arts and Sciences MACAS which was first held in 2005 following the continued collaboration of an international group of researchers from ICME Topic Study Group 21 The MACAS conferences bring together scientists and educators who are interested in the connection between mathematics arts and science in educational curriculum while emphasizing on as well as researching about the role of mathematics By pooling together these different approaches and viewpoints between mathematics arts and sciences this book reveals possible synergies and paths for collaborations In view of the challenges of the 21st century a modern approach to education with a focus on multi and interdisciplinarity is more important than ever The role of mathematics assumes a key role in this approach as it is connected to all other disciplines such as STEM education physics chemistry biology aesthetics and language and can serve as a bridge between them This book discusses amongst others the curricular approaches to integrate mathematics and other disciplines the importance of mathematical modelling and the interdisciplinarity ways for learning and studying of mathematics as well as the intercultural dimensions of mathematics and mathematics in the digital era All topics will be presented from very different perspectives and regarding very different contexts including digitization culture and sustainability This unique collection will serve as a very valuable and compact source for all above mentioned scientists and educators as well as for use in advanced teacher education courses

**Proceedings of The International Conference on Inter Disciplinary Research in Engineering and Technology 2015** Kokula Krishna Hari Kunasekaran, Vignesh R, 2015-04-30 Welcome to the International Conference on Inter Disciplinary Research in Engineering and Technology ICIDRET 2015 in DSIIDC Government of NCT New Delhi India Asia on 29 30 April 2015 If this is your first time to New Delhi you need to look on more objects which you could never forget in your lifetime There is much to see and experience at The National Capital of Republic of India The concept of Inter Disciplinary research was a topic of focus by various departments across the Engineering and Technology area Flushing with major areas this ICIDRET 15 has addressed the E T areas like Mechanical Engineering Civil Engineering Electrical Engineering Bio Technology Bio Engineering Bio Medical Computer

Science Electronics Communication Engineering Management and Textile Engineering This focus has brought a new insight on the learning methodologies and the terminology of accepting the cross definition of engineering and the research into it We invite you to join us in this inspiring conversation I am pretty sure that this conference would indulge the information from the various parts of the world and could coin as a global research gathering With more and more researchers coming into ICIDRET this event would be as an annual event This conference is sure that this edition and the future edition will serve as a wise platform for the people to come with better research methodologies integrating each and every social component globally If there would have been a thought of not integrating the RJ45 and few pieces of metal plastic along with a PCB today we could haven t used the telephones and mobile phones With an ear mark inspiration and constant support from the Global President Dr S Prithiv Rajan ASDF International President Dr P Anbuoli this publication stands in front of your eyes without them this would haven t been possible in a very shortest span Finally I thank my family friends students and colleagues for their constant encouragement and support for making this type of conference Kokula Krishna Hari K Editor in Chief [www.kokulakrishnaharik.in](http://www.kokulakrishnaharik.in)     *The People's Platform* Astra Taylor, 2014-04-15 An invaluable primer for anyone seeking to understand why our networked world isn't all that it is cracked up to be The Guardian The Internet has been hailed as an unprecedented democratizing force a place where everyone can be heard and all can participate equally But how true is this claim In a seminal dismantling of techno utopian visions The People's Platform argues that for all that we tweet and like and share the Internet in fact reflects and amplifies real world inequities at least as much as it ameliorates them Online just as off line attention and influence largely accrue to those who already have plenty of both What we have seen so far Astra Taylor says has been not a revolution but a rearrangement Although Silicon Valley tycoons have eclipsed Hollywood moguls a handful of giants like Amazon Apple Google and Facebook remain the gatekeepers And the worst habits of the old media model the pressure to seek easy celebrity to be quick and sensational above all have proliferated on the web where aggregating the work of others is the surest way to attract eyeballs and ad revenue When culture is free creative work has diminishing value and advertising fuels the system The new order looks suspiciously like the old one We can do better Taylor insists The online world does offer a unique opportunity but a democratic culture that supports diverse voices and work of lasting value will not spring up from technology alone If we want the Internet to truly be a people's platform we will have to make it so Beautifully written and highly recommended David Byrne musician and author     Probability, Choice, and Reason Leighton Vaughan Williams, 2021-09-16 Much of our thinking is flawed because it is based on faulty intuition By using the framework and tools of probability and statistics we can overcome this to provide solutions to many real world problems and paradoxes We show how to do this and find answers that are frequently very contrary to what we might expect Along the way we venture into diverse realms and thought experiments which challenge the way that we see the world Features An insightful and engaging discussion of some of the key ideas of probabilistic and statistical thinking Many classic and novel

problems paradoxes and puzzles An exploration of some of the big questions involving the use of choice and reason in an uncertain world The application of probability statistics and Bayesian methods to a wide range of subjects including economics finance law and medicine Exercises references and links for those wishing to cross reference or to probe further Solutions to exercises at the end of the book This book should serve as an invaluable and fascinating resource for university college and high school students who wish to extend their reading as well as for teachers and lecturers who want to liven up their courses while retaining academic rigour It will also appeal to anyone who wishes to develop skills with numbers or has an interest in the many statistical and other paradoxes that permeate our lives Indeed anyone studying the sciences social sciences or humanities on a formal or informal basis will enjoy and benefit from this book
