Condemned Again Skhumbuzo Letlaka, 2015-01-31 The work was conceived over a number of years and it relates to the manner in which African leaders govern their countries after independence Its main focus is on the South African politics under apartheid where racism and racial segregation was the order of the day and where white supremacy implied black inferiority It looks at a number of issues including humiliation and brutality that led to the United Nations declaring apartheid as crime against humanity It focuses on the processes leading to the build up of pressures that forced the racist government to accede to the demands of the international community and also bow to internal pressures which were exerted by the South African people themselves This book is written by a comrade who grew up in the township of Clermont a student of politics under the tutelage of Archie Gumede a man who rubbed shoulders with radicals such as Patrick Terror Lekota and Diliza Mji amongst others and a staunch Catholic whose wedding was conducted by Archbishop Denis Hurley Skhumbuzo Letlaka is a product of a township struggle stay aways consumer boycotts strikes school boycotts street committees and their tight discipline kangaroo courts and the application of the Mandela Plan *River Delta Futures* Francisco-J. Indigenous Technology Knowledge Systems Mishack T. Gumbo,P. John Williams,2023-07-21 There has been a growing interest in indigenous knowledge systems and research This interest has been mainly triggered by the need to decolonize education as a response to the colonial onslaught on indigenous knowledge and people Research has however concentrated on the generality of the indigenous knowledge system rather than on its related dimensions One area that has suffered a lack of attention is indigenous conceptions of science technology engineering and mathematics STEM despite the unquestionable evidence of STEM in indigenous contexts Most STEM is presented by colonial establishments and representations especially in developed modern urban contexts which portray STEM as a colonial construct This book focuses on indigenous technological knowledge systems education ITKSE Indigenous people have been at the front of technological developments from pre colonial times The list of precolonial industries science and technology is extensive including blacksmithing wood carving textile weaving and dyeing leather works beadworks pottery making architecture agricultural breeding metal working salt production gold smithing copper smithing leather crafting soap making bronze casting canoe building brewing glass making and agriculture for example In some parts of the world such as Africa and Australia these technologies still exist ITKSE should not be left to exist outside of the technology education curriculum and classroom as it can benefit both indigenous students who have been denied learning about what is relevant to them and non indigenous students These cultural groups can expand their knowledge of technology by learning both ITKSE and Western technological knowledge systems education WTKSE ITKSE also presents opportunities for technology teachers to reflect on and revisit their depth of technological knowledge pedagogies and assessment The intent of this book is transformational in the sense that it brings decolonial and indigenous perspectives into the technology education context It extends technology education in the sense that it will not only influence Western minded architects artisans designers etc but encourage indigenous mindedness as well
