essentialised and have specific and different meanings for particular social groups and how this may create issues in both quantitative survey methods and in determining what is the public good We discuss social justice across a range of intersecting social characteristics including social class ethnicity and gender as they are applied across the educational policy spectrum from early years to postgraduate education We examine the ways that young people construct their identities and the implications of this for understanding the public good in educational practice We consider the responsibilities of educational researchers to acknowledge these issues and offer examples of researching with such a commitment We conclude by considering how educational policy might contribute to a socially just equitable and inclusive public good Examcart NDA/NA Maths & GAT 36 Chapter-wise Solved Papers for 2024 Exam in English Examcart Experts,
