Introduction to Coordination Chemistry

Geoffrey A. Lawrance, 2013-03-15 At the heart of coordination chemistry lies the coordinate bond in its simplest sense arising from donation of a pair of electrons from a donor atom to an empty orbital on a central metalloid or metal Metals overwhelmingly exist as their cations but these are rarely met naked they are clothed in an array of other atoms molecules or ions that involve coordinate covalent bonds hence the name coordination compounds These metal ion complexes are ubiquitous in nature and are central to an array of natural and synthetic reactions Written in a highly readable descriptive and accessible style Introduction to Coordination Chemistry describes properties of coordination compounds such as colour magnetism and reactivity as well as the logic in their assembly and nomenclature It is illustrated with many examples of the importance of coordination chemistry in real life and includes extensive references and a bibliography Introduction to Coordination Chemistry is a comprehensive and insightful discussion of one of the primary fields of study in Inorganic Chemistry for both undergraduate and non specialist readers

The Microeconomics Anti-Textbook Rod Hill, Tony Myatt, 2021-12-02 Mainstream textbooks present economics as an objective science free from value judgements The Microeconomics Anti Textbook demonstrates this to be a myth one which serves to make such textbooks not only off puttingly bland but also dangerously misleading in their justification of the status quo and neglect of alternatives In this fully updated and expanded edition of their celebrated book Professors Rod Hill and Tony Myatt lay out the essentials of each topic in the standard texts in a clear and concise way before presenting an anti text analysis and critique Challenging the assumptions arguments and models Hill and Myatt provide the essential guide to decoding the textbooks and show that real economics is

David Hung, Shu-Shing Lee, Yancy Toh, Azilawati Jamaludin, Longkai Wu, 2019-08-07 This book offers an ecological perspective to understand the opportunities and complexities of spreading and sustaining educational innovations It explores the imperatives underpinning educational reforms and identifies the role of schools in developing disseminating and sustaining changes in Singapore's educational context It also includes international case studies that examine the dialectical relationships between structure people and culture and demonstrate that cultivating ecologies involves leveraging affordances and resources across the education system to create new contexts synergies and capacities Further it argues that educational innovations and reforms also need to consider tacit knowledge and conditions of transfer which may be ambiguous and challenging Few books address the nuances and interactions of innovation and change across levels of the education ecology from the micro classroom meso organisation school exo partners macro policy and chrono time scales levels The ecological perspective adopted in this book explores the dynamic tensions in order to understand the interplays of policy and school level influences that contextualize school innovations By presenting multiple voices and views it allows impediments and affordances of innovation diffusion to be discussed holistically which is an integral caveat for nurturing a sustainable ecology that enables innovations **Brunner & Suddarth's Canadian Textbook of Medical-Surgical**
