Education Reform: The Unwinding of Intelligence and Creativity Des Griffin, 2013-12-19 This book pays special attention to the

impact that a student's early childhood and socioeconomic status has on his or her educational achievement. It argues that discussions of education reform need a broader scope, one that encompasses a student's background as well as standardized testing, merit pay for teachers, and other issues regarding the quality of the teaching and learning. Education Reform: The Unwinding of Intelligence and Creativity features cases and examples from schools in Australia, the USA, and Britain. It offers a breadth of coverage from early childhood to effective teaching and learning, to teacher pay and conditions, standardized testing, and public and private independent schooling and universities, as well as creativity. It also includes summaries of educational policies in many developed countries. Reforms which emphasize concern for early childhood, school leadership, and respect for teachers are contrasted with ones based on standardized tests, private schools, and sacking bad teachers.

Critical Analyses of Educational Reforms in an Era of Transnational Governance Elisabeth Hultqvist, Sverker Lindblad, Thomas S. Popkewitz, 2017-10-20. This book represents a set of critical analyses of educational reforms where issues of transnational governance are of vital concern. It focuses on different aspects of and practices in educational reform, making and in particular on governing techniques and the working of new agencies such as supranational and multinational organizations. In addition, the book examines contemporary issues of immigration, immigrants in the politics of schooling, by reflecting on matters of migration and problematizing how concepts such as exclusion and abjection make the migrants appear failed, insufficient, and even dangerous. The book provides theoretical insights into critical relations between knowledge and power, governance and governmentality, and notions concerning educational systems, as well as how these are compared. The central themes of the book are models for organizing and reflecting on transnationalization and educational reforms. In its discussion of those themes, the focus lies on changing conceptions of education and the educational system, on how school or teacher education is adapting to discourses of effectiveness and efficiency, and on their transformation according to standardized templates. Such changing conceptions define the meanings of education and educational progress; they are important for the identification and analysis of educational knowledge and for critical discourses on education in society.
