Discovering the Ocean from Space Ian S. Robinson, 2010-08-12 This book offers a survey of the contribution of satellite data to the study of the ocean focusing on the special insights that only satellite data can bring to oceanography Topics range from ocean waves to ocean biology spanning scales from basins to estuaries Some chapters cover applications to pure research while others show how satellite data can be used operationally for tasks such as pollution monitoring or oil spill detection

Oceanography from Space Vittorio Barale, J.F.R. Gower, L. Alberotanza, 2010-04-26 To all those sailors Who dreamed before us Of another way to sail the oceans The dedication of this Volume is meant to recall and honour the bold pioneers of ocean exploration ancient as well as modern As a marine scientist dealing with the oceans through the complex tools, lters and mechanisms of contemporary research I have always wondered what it was like in centuries past to look at that vast horizon with the naked eye not knowing what was ahead and yet to sail on I have tried to imagine what ancient sailors felt when the unknown swirls around and engulfs the mind as a forgotten author simply described the brave perhaps reckless act of facing such a hostile menacing and yet fascinating adventure Innovation has always been the key element I think for their success another way a better way a more effective safer and worthier way was the proper answer to the challenge The map of our world has been changed time and again from the geographical as well as the social economic and scientific points of view by the new discoveries of those sailors One of the positive qualities of human beings is without doubt the inborn desire to expand their horizons to see what lies beyond to learn and understand

The Routledge Handbook of Ocean Space Kimberley Peters, Jon Anderson, Andrew Davies, Philip Steinberg, 2022-07-29 Invisible as the seas and oceans may be for so many of us life as we know it is almost always connected to and constituted by activities and occurrences that take place in on and under our oceans The Routledge Handbook of Ocean Space provides a first port of call for scholars engaging in the oceanic turn in the social sciences offering a comprehensive summary of existing trends in making sense of our water worlds alongside new agenda setting insights into the relationships between society and the seas around us Accordingly this ambitious text not only attends to a growing interest in our oceans past and present it is also situated in a broader spatial turn across the social sciences that seeks to account for how space and place are imbricated in socio cultural and political life Through six clearly structured and wide

ranging sections The Routledge Handbook of Ocean Space examines and interrogates how the oceans are environmental historical social cultural political legal and economic spaces and also zones where national and international security comes into question With a foreword and introduction authored by some of the leading scholars researching and writing about ocean spaces alongside 31 further carefully crafted chapters from established as well as early career academics this book provides both an accessible guide to the subject and a cutting edge collection of critical ideas and questions shaping the social sciences today This handbook brings together the key debates defining the field in one volume appealing to a wide cross disciplinary social science and humanities audience Moreover drawing on a range of international examples from a global collective of authors this book promises to be the benchmark publication for those interested in ocean spaces past and present Indeed as the seas and oceans continue to capture world wide attention and the social sciences continue their seaward turn The Routledge Handbook of Ocean Space will provide an invaluable resource that reveals how our world is a water world *Oceans from Space* Christian Aage,1999

Space Remote Sensing of Subtropical Oceans (SRSSO) Cho-Teng Liu,1997-07-29 This volume contains the proceedings from the COSPAR Colloquium on Space Remote Sensing of Subtropical Oceans which took place between 12 and 16 September 1996 at the Institute of Oceanography of the National Taiwan University Included are contributions addressing the issue from scientific points of views of why the first scientific satellite of Taiwan ROCSAT 1 should be equipped with the Ocean Colour Imager OCI for oceanographic investigations

Earth Science and Applications from Space National Research Council,Division on Engineering and Physical Sciences,Space Studies Board,Committee on Earth Science and Applications from Space: A Community Assessment and Strategy for the Future,2007-10-01 Natural and human induced changes in Earth s interior land surface biosphere atmosphere and oceans affect all aspects of life Understanding these changes requires a range of observations acquired from land sea air and space based platforms To assist NASA NOAA and USGS in developing these tools the NRC was asked to carry out a decadal strategy survey of Earth science and applications from space that would develop the key scientific questions on which to focus Earth and environmental observations in the period 2005 2015 and beyond and present a prioritized list of space programs missions and supporting activities to address these questions This report presents a vision for the Earth science program an analysis of the existing Earth Observing System and recommendations to help restore its capabilities an assessment of and recommendations for new observations and missions for the next decade an examination of and recommendations for effective application of those observations and an analysis of how best to sustain that observation and applications system Satellite Altimetry Over Oceans and Land Surfaces Detlef Stammer,Anny Cazenave,2017-10-31 Satellite remote sensing in particular by radar altimetry is a crucial technique for observations of the ocean surface and of many aspects of land surfaces and of paramount importance for climate and environmental studies This book provides a state of the art overview of the satellite altimetry techniques and related missions and reviews the most up to date applications to

ocean dynamics and sea level. It also discusses related space based observations of the ocean surface and of the marine geoid as well as applications of satellite altimetry to the cryosphere and land surface waters, operational oceanography and its applications to navigation, fishing and defense.
