Money and Inflation Mehdi Chowdhury, 2024-03-23 The book goes beyond the usual understanding of money physically electronically or virtually expressed in term of monetary units like dollars pounds gold coins or bitcoins and discusses how money is best conceptualised as the ability of a person party to obtain goods and services from another person party This ability may originate from the access of a person party to money in usual sense e.g dollars pounds but also via force social norms mutual negotiation altruism trust or due to human biological characteristics As the ability to obtain goods and services from others depends on the context what functions as money in a time and place may not function as money in another time and place as such money has no universal type or representation The book explains inflation as the increased need to acquire money that is the need to employ more physical and mental labour to create the ability to obtain a wide range of goods and services This book provides an explanation of the post covid price hike and the cost of living crisis by taking this new theory into

consideration which will be of interest to academics researchers policy makers and students studying finance monetary economics and inflation

Frieden,2012-10-01 A clear authoritative guide to the crisis of 2008 its continuing repercussions and the needed reforms ahead The U S economy lost the first decade of the twenty first century to an ill conceived boom and subsequent bust It is in danger of losing another decade to the stagnation of an incomplete recovery How did this happen Read this lucid explanation of the origins and long term effects of the recent financial crisis drawn in historical and comparative perspective by two leading political economists By 2008 the United States had become the biggest international borrower in world history with more than two thirds of its 6 trillion federal debt in foreign hands The proportion of foreign loans to the size of the economy put the United States in league with Mexico Indonesia and other third world debtor nations The massive inflow of foreign funds financed the booms in housing prices and consumer spending that fueled the economy until the collapse of late 2008 This was the most serious international economic crisis since the Great Depression of the 1930s Menzie Chinn and Jeffrey Frieden explain the political and economic roots of this crisis as well as its long term effects They explore the political strategies behind the Bush administration s policy of funding massive deficits with foreign borrowing They show that the crisis was foreseen by many and was avoidable through appropriate policy measures They examine the continuing impact of our huge debt on the continuing slow recovery from the recession Lost Decades will long be regarded as the standard account of the crisis and its aftermath
