Social Cognition, Inference, and Attribution R. S. Wyer, Jr., D. E. Carlston, 2018-12-07 First published in 1979 This book developed out of a series of general discussions between the authors on research and theory in person perception and attribution phenomena During the course of this discussion two things became clear First many of the traditional approaches to investigating these phenomena made popular during the past decade by the advent of algebraic models of information integration were not providing answers to several fundamental questions concerning the manner in which social stimulus information is interpreted organized and stored in memory and the factors that affect its retrieval and use in making judgments of the people and events to which it is relevant Second many fundamental issues associated with the processing of social stimulus information were relevant to phenomena investigated in a variety of traditionally segregated areas e g impression formation attribution social comparison interpersonal attraction belief and opinion change etc However these commonalities were rarely identified This appeared to result from a tendency to focus on micro theoretical formulations developed to account for a circumscribed set of phenomena without considering these phenomena within a broader conceptual framework This book is an attempt to respond to these various deficiencies
