Genesis 300 System Owner's Manual

Set up the speakers. A good starting position for the Genesis 300's is about one third the way into the room as measured from the wall behind the loudspeakers. You want to sit approximately two thirds the way in the room, again as measured from the rear wall. Generally speaking, the speakers should fire into the long dimension of the room.

Measure the distance between the tweeters on each panel. Make sure that the tweeters are on the inside edge speaker. Both tweeter arrays should be in the center. Start with approximately six to eight feet apart (two and three quarter meters) if your room dimensions will allow.

Hook up the woofers. Included with your Genesis 300's there is a set of large cables used to connect the woofers. Each end of the cable is clearly marked, "amplifier" or "speaker". Connect these to the appropriate end of your Genesis subwoofer amplifier, and the rear of the woofer cabinet. It does not matter which connector is attached to which woofer as long as the channels are correct.

One note: When you connect the subwoofer outputs pay close attention to the way our connector works. The connector is called a Neutrik, it only goes in one way. You cannot put it in wrong. However, you can fail to put it in all the way. When you look at the plug, one side has writing on it and an arrow. This is the right direction. Push the plug in, and twist it clockwise, and then turn the locking ring or wait for the finger lock to "click" in place (depending on the type of connector
