Genius In France An Idea And Its Uses:

Genius in France Ann Jefferson, 2014-12-21 This engaging book spans three centuries to provide the first full account of the long and diverse history of genius in France Exploring a wide range of examples from literature philosophy and history as well as medicine psychology and journalism Ann Jefferson examines the ways in which the idea of genius has been ceaselessly reflected on and redefined through its uses in these different contexts She traces its varying fortunes through the madness and imposture with which genius is often associated and through the observations of those who determine its presence in others Jefferson considers the modern beginnings of genius in eighteenth century aesthetics and the works of philosophes such as Diderot She then investigates the nineteenth century notion of national and collective genius the self appointed role of Romantic poets as misunderstood geniuses the recurrent obsession with failed genius in the realist novels of writers like Balzac and Zola the contested category of female genius and the medical literature that viewed genius as a form of pathology She shows how twentieth century views of genius narrowed through its association with IQ and child prodigies and she discusses the different ways major theorists including Sartre Barthes Derrida and Kristeva have repudiated and subsequently revived the concept Rich in narrative detail **Genius in France** brings a fresh approach to French intellectual and cultural history and to the burgeoning field of genius studies

The Places of Early Modern Criticism Gavin Alexander, Emma Gilby, Alexander Marr, 2021-04-29 What is criticism And where is it to be found Thinking about literature and the visual arts is found in many places in treatises apologies and paragoni in prefaces letters and essays in commentaries editions reading notes and commonplace books in images sculptures and built spaces within or on the thresholds of works of poetry and visual art It is situated between different disciplines and methods Critical ideas and methods come into England from other countries and take root in particular locations the court the Inns of Court the theatre the great house the printer s shop the university The practice of criticism is transplanted to the Americas and attempts to articulate the place of poetry in a new world And commonplaces of classical poetics and rhetoric serve both to connect and to measure the space between different critical discourses Tracing the history of the development of early modern thinking about literature and the visual arts requires consideration of various kinds of place material textual geographical and the practices particular to those places it also requires that those different places be brought into dialogue with each other This book brings together scholars working in departments of English modern languages and art history to look at the many different places of early modern criticism It argues polemically for the necessity of looking afresh at the scope of criticism and at what happens on its margins and for interrogating our own critical practices and disciplinary methods by investigating their history

Transcultural Poetics and the Concept of the Poet Ranjan Ghosh, 2016-12-08 Critiquing the politics and dynamics of the transcultural poetics of reading literature this book demonstrates an ambitious understanding of the concept of the poet across a wide range of traditions Anglo American German French Arabic Chinese Sanskrit Bengali Urdu and philosophies of creativity that are rarely studied side by side Ghosh carves out unexplored spaces of negotiation and intersections between literature aesthetics and philosophy The book demonstrates an original method of global comparison that displaces the relatively staid and historicist categories that have underpinned comparative literature approaches so far since they rarely dare stray beyond issues of influence and schools or new world literature approaches that affirm cosmopolitanism and transnationalism as overarching themes Going beyond comparatism and reformulating the chronological patterns of reading this bold book introduces new methodologies of reading literature to configure the concept of the poet from Philip Sidney to T S Eliot reading the notion of the poet through completely new theoretical and epistemic triggers Commonly known texts and sometimes well circulated ideas are subjected to refreshing reading in what the author calls the transcultural now and in fusionised transpoetical matrices By moving between theories of poetry and literature that come from widely separated times contexts and cultures this book shows the relevance of canonical texts to a theory of the
