Selected Papers in the Applied Computer Sciences, 1992 Denise A. Wiltshire, 1992 *The Geographical Sciences During 1986—2015* Shuying Leng, Xizhang Gao, Tao Pei, Guoyou Zhang, Liangfu Chen, Xi Chen, Canfei He, Daming He, Xiaoyan Li, Chunye Lin, Hongyan Liu, Weidong Liu, Yihe Lü, Shilong Piao, Qihong Tang, Fulu Tao, Lide Tian, Xiaohua Tong, Cunde Xiao, Desheng Xue, Linsheng Yang, Linwang Yuan, Yuanming Zheng, Huiyi Zhu, Liping Zhu, 2016-07-28 In four chapters and an introduction this book systematically helps readers understand the development of the Geographical Sciences both in China and in the world during the past 30 years. Through data analysis of methodologies including CiteSpace, TDA, qualitative analysis, questionnaires, data mining, and mathematical statistics, the book explains the evolution of research topics and their driving factors in the Geographical Sciences and its four branches: namely Physical Geography, Human Geography, Geographical Information Science, and Environmental Geography. It also identifies the role of the Geographical Sciences in the analysis of strategic issues such as global change and terrestrial ecosystems, terrestrial water cycle and water resources, land change, global cryosphere evolution, and land surface processes on the Tibetan Plateau, economic globalization and local responses, regional sustainable development, remote sensing, modelling and parameter inversion, spatial analysis and simulation, and tempo-spatial processes and modelling of environmental pollutants. It then discusses research development and inadequacy of Chinese Geographical Sciences in the above-mentioned topics as well as in the fields including Geomorphology and Quaternary environmental change, Ecohydrology, ecosystem services, the urbanization process, and mechanism, medical and health geography, international rivers and transboundary environment, and resources detection and attribution of changes in land surface sensitive components and uncertainty of spatial information and spatial analysis. It shows that the NSFC has driven the development in all these topics and fields. In addition, the book summarises trends of the Geographical Sciences in China and the research level in major countries of the world through an overview of geographical education in colleges and universities, the analysis of publications, citations, and author networks of SCI, SSCI, and CSCD indexed articles, and the description of Sino-US, Sino-UK, and Sino-German cooperation. This book serves as an important reference to anyone interested in geographical sciences and related fields. **The Confines of Territory** John

Agnew, 2020-12-17 The word territory has taken on renewed significance in a world where its close association with state sovereignty has made a serious comeback, invoked alike by proponents of Brexit in the UK, Making America Great Again in the USA, and myriad populists from India to Brazil, by way of Italy and Hungary. The word has had a contentious history in social science and political theory. In its first seven years, the journal *Territory Politics Governance* has published numerous articles examining the ways in which territory figures into contemporary political debates and its limits as a concept when applied to a world in which sovereignty never has simply pooled up within self-evidently distinctive blocs of space named as

territories Among other things the limits of territory are apparent in terms of the history of a global capitalism that always bursts beyond established boundaries the fact that some states are much more powerful and exercise much more spatial reach than do others and that the political uses of territory in its current usage date back predominantly to seventeenth century Europe rather than being historically transcendental or worldwide The articles in this book are selected from Territory Politics Governance to survey many of the dilemmas and questions that haunt the concept of territory even as its current efflorescence in political discourse ignores them **Saving More Than Seeds** Catherine Phillips,2016-04-01

Saving More Than Seeds advances understandings of seed people relations with particular focus on seed saving The practice of reusing and exchanging seeds provides foundation for food production and allows humans and seed to adapt together in dynamic socionatural conditions But the practice and its practitioners are easily taken for granted even as they are threatened by neoliberalisation Combining original ethnographic research with investigation of an evolving corporate seed order this book reveals seed saving not only as it occurs in fields and gardens but also as it associates with genebanking genetic engineering intellectual property rights and agrifood regulations Drawing on diverse social sciences literatures Phillips illustrates ongoing practices of thinking feeling and acting with seeds raising questions about what seed people relations should accomplish and how different ways of relating might be pursued to change collective futures **Handbook**

of Cities and the Environment Kevin Archer,Kris Bezdecny,2016-12-30 With an ever growing majority of the world's human population living in city spaces the relationship between cities and nature will be one of the key environmental issues of the 21st Century This book brings together a diverse set of authors to explore the various aspects of this relationship both theoretically and empirically Rather than considering cities as wholly separate from nature a running theme throughout the book is that cities and city dwellers should be characterized as intrinsic in the creation of specifically urban generated socio natures Life Adrift Andrew Baldwin,Giovanni Bettini,2017-05-24 Life Adrift critically engages with two of the most

defining issues of our contemporary global political economy migration and climate change In their own right both are discrete areas of politics theory practice and resistance But as climate and migration are increasingly imagined together as a singular relation they are giving rise to new horizons of meaning in politics philosophy media art and literature Life Adrift is a collection of essays from across the interpretive social sciences and humanities which treats climate change and migration as a relation that demands theoretical and historical explanation rather than a problem requiring technical and expert solutions The result is a unique collection offering readers a means for reconceptualising migration and environmental changes as a site of politics and of political possibility Along the way it addresses a range of topics current in cultural and political theory including democracy place neoliberalism humanism materiality borders affect race and sexuality If climate change stands to redistribute humans and material across the globe then Life Adrift offers a set of critical resources for analysing this coming phenomenon and reimagining what it might mean to be political in a fully immanent world of bodies in
