Hadoop: The Definitive Guide Tom White, 2012-05-10 Ready to unlock the power of your data With this comprehensive guide you ll learn how to build and maintain reliable scalable distributed systems with Apache Hadoop This book is ideal for programmers looking to analyze datasets of any size and for administrators who want to set up and run Hadoop clusters You ll find illuminating case studies that demonstrate how Hadoop is used to solve specific problems This third edition covers recent changes to Hadoop including material on the new MapReduce API as well as MapReduce 2 and its more flexible execution model YARN Store large datasets with the Hadoop Distributed File System HDFS Run distributed computations with MapReduce Use Hadoop s data and I O building blocks for compression data integrity serialization including Avro and persistence Discover common pitfalls and advanced features for writing real world MapReduce programs Design build and administer a dedicated Hadoop cluster or run Hadoop in the cloud Load data from relational databases into HDFS using Sqoop Perform large scale data processing with the Pig query language Analyze datasets with Hive Hadoop s data warehousing system Take advantage of HBase for structured and semi structured data and ZooKeeper for building distributed systems

Hadoop Security Ben Spivey, Joey Echeverria, 2015-06-29 As more corporations turn to Hadoop to store and process their most valuable data the risk of a potential breach of those systems increases exponentially This practical book not only shows Hadoop administrators and security architects how to protect Hadoop data from unauthorized access it also shows how to limit the ability of an attacker to corrupt or modify data in the event of a security breach Authors Ben Spivey and Joey Echeverria provide in depth information about the security features available in Hadoop and organize them according to common computer security concepts You ll also get real world examples that demonstrate how you can apply these concepts to your use cases Understand the challenges of securing distributed systems particularly Hadoop Use best practices for preparing Hadoop cluster hardware as securely as possible Get an overview of the Kerberos network authentication protocol Delve into authorization and accounting principles as they apply to Hadoop Learn how to use mechanisms to protect data in a Hadoop cluster both in transit and at rest Integrate Hadoop data ingest into enterprise wide security architecture Ensure that security architecture reaches all the way to end user access

Machine Learning Models and Algorithms for Big Data Classification Shan Suthaharan, 2015-10-20 This book presents machine learning models and algorithms to address big data classification problems Existing machine learning techniques like the decision tree a hierarchical approach random forest an ensemble hierarchical approach and deep learning a layered approach are highly suitable for the system that can handle such problems This book helps readers especially students and newcomers to the field of big data and machine learning to gain a quick understanding of the techniques and technologies therefore the theory examples and programs Matlab and R presented in this book have been simplified hardcoded repeated or spaced for improvements They provide vehicles to test

and understand the complicated concepts of various topics in the field It is expected that the readers adopt these programs to experiment with the examples and then modify or write their own programs toward advancing their knowledge for solving more complex and challenging problems The presentation format of this book focuses on simplicity readability and dependability so that both undergraduate and graduate students as well as new researchers developers and practitioners in this field can easily trust and grasp the concepts and learn them effectively It has been written to reduce the mathematical complexity and help the vast majority of readers to understand the topics and get interested in the field This book consists of four parts with the total of 14 chapters The first part mainly focuses on the topics that are needed to help analyze and understand data and big data The second part covers the topics that can explain the systems required for processing big data The third part presents the topics required to understand and select machine learning techniques to classify big data Finally the fourth part concentrates on the topics that explain the scaling up machine learning an important solution for modern big data problems

Trino: The Definitive Guide Matt Fuller, Manfred Moser, Martin Traverso, 2022-10-03 Perform fast interactive analytics against different data sources using the Trino high performance distributed SQL query engine In the second edition of this practical guide you ll learn how to conduct analytics on data where it lives whether it s a data lake using Hive a modern lakehouse with Iceberg or Delta Lake a different system like Cassandra Kafka or SingleStore or a relational database like PostgreSQL or Oracle Analysts software engineers and production engineers learn how to manage use and even develop with Trino and make it a critical part of their data platform Authors Matt Fuller Manfred Moser and Martin Traverso show you how a single Trino query can combine data from multiple sources to allow for analytics across your entire organization Explore Trino s use cases and learn about tools that help you connect to Trino for querying and processing huge amounts of data Learn Trino s internal workings including how to connect to and query data sources with support for SQL statements operators functions and more Deploy and secure Trino at scale monitor workloads tune queries and connect more applications Learn how other organizations apply Trino successfully
