Eastern European ideas and cultures constituted an integral part of wider European trends. However, the intellectual and cultural history of this diverse region has rarely been incorporated sufficiently into nominally comprehensive histories of Europe. This volume redresses this underrepresentation and provides a more balanced perspective on the recent past of the continent through original critical overviews of themes ranging from the social and conceptual history of intellectuals and histories of political thought and historiography to literary visual and religious cultures to perceptions and representations of the region in the twentieth century. While structured thematically, individual contributions are organized chronologically. They emphasize where relevant generational experiences, agendas and accomplishments while taking into account the sharp ruptures that characterize the period. The third in a four volume set on Central and Eastern Europe in the twentieth century, it is the go to resource for understanding the intellectual and cultural history of this dynamic region.

Picturing the Land Marylin Jean McKay, 2011. The vast Canadian landscape has captured the imagination of visual artists since the first European contact. Although artistic engagement with the landscape has a long history, some periods have drawn considerable critical attention while others have been left almost unexamined. *Picturing the Land* surveys work from coast to coast from the earliest maps to postwar painting in English and French Canada. To provide a comprehensive view of Canadian landscape art, emphasizing the ways in which social, economic and political conditions determine representation, Marylin McKay moves beyond canonical images and traditional nationalistic interpretations by analyzing Canadian landscape art in relation to different concepts of territory. Taking an expansive and inclusive perspective on Canadian landscape art, McKay depicts this tradition in all its diversity and draws it into the larger body of Western landscape art, broadening the horizon of future study, appreciation and criticism. Richly illustrated and filled with sophisticated and innovative commentary, *Picturing the Land* provides new and distinct histories of the landscape art of French and English Canada.
