Debbie Anne Sellwood, 2024-03-29 A transformation in human consciousness is taking place And it s generating a growing interest in how subtle elements of the human constitution play a part in the maintenance of our health and wellbeing You Are a Frequency introduces a new paradigm for health and healing based on the whole person not the physical body on which traditional medicine focuses In this book Debbie Sellwood describes the human being s various energy systems indicating that everything animal vegetable and mineral has its own unique vibration She explains how these energy bodies influence our health and wellbeing that the physical body is a medium for the consciousness of the energy bodies You Are a Frequency explains that how we perceive and react to life events determine what experiences we attract into our lives including health Our reactions also impact the frequency of our vibrations and by raising our vibrations we become more empowered able to take responsibility for ourselves It is the author s belief that understanding ourselves as energetic beings will ultimately inspire a future health paradigm and lead to the transformation of the medical system This book will appeal to the increasing number of people who are aware of a spiritual component to their existence who want to understand who they really are and their potential at a more holistic level The times in which we live are causing us to acknowledge that there is more to life and to ourselves than meets the eye you are more than you think **Interventions in Career Design and Education**

Brown,2013-06-26 It is now well accepted that deforestation is a key source of greenhouse gas emissions and of climate change with forests representing major sinks for carbon As a result public and private initiatives for reducing emissions from deforestation and forest degradation REDD have been widely endorsed by policy makers A key issue is the feasibility of carbon trading or other incentives to encourage land owners and indigenous people particularly in developing tropical countries to conserve forests rather than to cut them down for agricultural or other development purposes This book presents a major critique of the aims and policies of REDD as currently structured particularly in terms of their social feasibility It is shown how the claims to be able to reduce greenhouse gas emissions as well as enhance people s livelihoods and biodiversity conservation are unrealistic There is a naive assumption that technical or economic fixes are sufficient for success However the social and governance aspects of REDD and its enhanced version known as REDD are shown to be implausible Instead to enhance REDD s prospects the author provides a roadmap for developing a new social contract that puts people first The Routledge Companion to Biology in Art and Architecture Charissa Terranova,Meredith Tromble,2016-08-12 The Routledge Companion to Biology in Art and Architecture collects thirty essays from a transdisciplinary array of experts on biology in art and architecture The book presents a diversity of hybrid art and science thinking revealing how science and culture are interwoven The book situates bioart and bioarchitecture within an expanded field of biology in art architecture and design It proposes an emergent field of biocreativity and outlines its historical and theoretical foundations from the perspective of artists architects designers scientists historians and theoreticians Includes over 150 black and white images **Participation without Democracy** Garry Rodan,2018-05-15 Over the past quarter century new ideologies of participation and representation have proliferated across democratic and non democratic regimes In *Participation without Democracy* Garry Rodan breaks new conceptual ground in examining the social forces that underpin the emergence of these innovations in Southeast Asia Rodan explains that there is however a central paradox in this

recalibration of politics expanded political participation is serving to constrain contestation more than to enhance it

Participation without Democracy uses Rodan's long term fieldwork in Singapore the Philippines and Malaysia to develop a modes of participation MOP framework that has general application across different regime types among both early developing and late developing capitalist societies His MOP framework is a sophisticated original and universally relevant way of analyzing this phenomenon Rodan uses MOP and his case studies to highlight important differences among social and political forces over the roles and forms of collective organization in political representation In addition he identifies and distinguishes hitherto neglected non democratic ideologies of representation and their influence within both democratic and authoritarian regimes Participation without Democracy suggests that to address the new politics that both provokes these institutional experiments and is affected by them we need to know who can participate how and on what issues and we need to take the non democratic institutions and ideologies as seriously as the democratic ones
