Paper 2 National and international economy

June 2013 (new style)

Time allowed: 2 hours

Instructions

- In **Section A**, answer **EITHER** Context 1 **OR** Context 2.
- In **Section B**, answer **one** essay.

Information

- There are 80 marks available on this paper.
- The marks for questions are shown in brackets.

Please note: This is not an AQA publication. The questions from the original ECO204 paper have been altered in order to make them more closely resemble questions from the new 7136/2 Economics paper and the number of marks awarded for each question is in line with the new specification also.

Summary of changes: in Section A, the old question 1 for each context has been pulled apart to create a calculation question (new question 1) and an explain from the data question (new question 2); old question 2 has been tweaked to turn it into an explain with the use of a diagram question (new question 3); old question 3 (the 25 mark question) remains largely unchanged as the new question 4. Questions in Section B are unaltered.

working in economic theory and the computational social sciences Politics Meets Markets Tao Huang, Weiping He, 2024-12-17 The book highlights several aspects with Chinese characteristics that set the country's financial system apart. One key element is the significant influence of the Communist Party of China (CPC) on the financial markets. The Party plays a crucial role in shaping and driving policies within the financial sector, reflecting a distinct interplay between politics and finance. Additionally, the book emphasizes the involvement of various authorities within the government, the court system, and the intricate relationship between the courts and the governments in influencing the dynamics of the financial markets. These factors collectively contribute to a distinctive environment that cannot be fully understood through conventional theoretical frameworks. The major analytical points of the book revolve around the intricate triangular relationships among China's politics, financial market rules, and the financial markets themselves. The authors argue that relying solely on any existing school of thoughts is insufficient for comprehending the complexities of China's financial landscape. Instead, the book explores the multifaceted connections between politics, courts, and the financial markets. It delves into how political forces drive the formulation, development, and enforcement of financial market rules, including the roles played by various government bodies and the legal system. Unlike a focus on regulations and rules merely on paper, the book takes a grounded approach by investigating China's financial markets rules in practical terms. By doing so, it seeks to discover the underlying logic behind the unique features of China's financial system, providing a nuanced understanding of the interactions between political forces, legal frameworks, and the financial markets in the Chinese context.

Inequality Studies from the Global South David Francis, Imraan Valodia, Edward Webster, 2020-05-04 This book offers an innovative interdisciplinary approach to thinking about inequality and to understanding how inequality is produced and reproduced in the global South. Without the safety net of the various Northern welfare states, inequality in the global South is not merely a socio-economic problem but an existential threat to the social contract that underpins the democratic state and society itself. Only a response that is firmly grounded in the context of the global South can hope to address this problem. This collection brings together scholars from across the globe with a particular focus on the global South to address broad thematic areas such as the conceptual and methodological challenges of measuring inequality, the political economy of inequality in the global South, inequality in work, households, and the labour market, and inequalities in land, spaces, and cities. The book concludes by suggesting alternatives for addressing inequality in the global South and around the world. The pioneering ideas and theories put forward by this volume make it essential reading for students and researchers of global inequality across the fields of sociology, economics, law, politics, global studies, and development studies.

The Shifts and the Shocks Martin Wolf, 2014-09-11 From the chief economic commentator for the Financial Times, a brilliant tour d'horizon of the new global economy. There have been many books that have sought to

explain the causes and courses of the financial and economic crisis that began in 2007 *The Shifts and the Shocks* is not another detailed history of the crisis but is the most persuasive and complete account yet published of what the crisis should teach us about modern economies and economics. Written with all the intellectual command and trenchant judgment that have made Martin Wolf one of the world's most influential economic commentators, *The Shifts and the Shocks* matches impressive analysis with no holds barred criticism and persuasive prescription for a more stable future. It is a book no one with an interest in global affairs will want to neglect.
